Rofe-Beketov,Aleksandr M. Khol'kin,Ognjen Milatovic,2005 This is the first monograph devoted to the Sturm oscillatory theory for infinite systems of differential equations and its relations with the spectral theory It aims to study a theory of self adjoint problems for such systems based on an elegant method of binary relations Another topic investigated in the book is the behavior of discrete eigenvalues which appear in spectral gaps of the Hill operator and almost periodic Schrödinger operators due to local perturbations of the potential e.g modeling impurities in crystals The book is based on results that have not been presented in other monographs The only prerequisites needed to read it are basics of ordinary differential equations and operator theory It should be accessible to graduate students though its main topics are of interest to research mathematicians working in functional analysis differential equations and mathematical physics as well as to physicists interested in spectral theory of differential operators Transnational Film Remakes Iain Robert Smith,2017-03-08 What happens when a film is remade in another national context How do notions of translation adaptation and localisation help us understand the cultural dynamics of these shifts and in what ways does a transnational perspective offer us a deeper understanding of film remaking Bringing together a range of international scholars Transnational Film Remakes is the first edited collection to specifically focus on the phenomenon of cross cultural remakes Using a variety of case studies from Hong Kong remakes of Japanese cinema to Bollywood remakes of Australian television

this book provides an analysis of cinematic remaking that moves beyond Hollywood to address the truly global nature of this phenomenon Looking at iconic contemporary titles such as *The Girl with the Dragon Tattoo* and *Oldboy* as well as classics like *La Bete Humaine* and *La Chienne* this book interrogates the fluid and dynamic ways in which texts are adapted and reworked across national borders to provide a distinctive new model for understanding these global cultural borrowings
