

Frequency Change Instructions

If there is interference with the operation of the scales (ex. much slower operation than normal or no operation at all) it may be necessary to change the frequency. This can be done by following these steps.

1. Set all scale pads out individually (at least 12" apart).
2. Pivot the hand held antenna until the antenna is perpendicular to the floor (this is essential for communication between the pads and hand held) and turn the hand held on by pushing the "ON/OFF" button. DO NOT turn the scale pads on at this time.
3. When the menu appears, select "RF Frequency" by pressing the "OK" button. Give the unit a few seconds to scan the channels and you will see numbers appear under "ACTIVITY". Scroll the arrow down and select the frequency with the lowest number (least amount of interference) by pressing "OK". (Typically 903-915 communicate the fastest.)
4. Turn the hand held off by pushing the "ON/OFF" button for 2 seconds.
5. Turn the scale pads on by switching the battery switch on each scale pad to "ON" and press the reset button on the front of the black box (Green light will start blinking indicating power is on.)
6. Turn the hand held back on by pushing the "ON/OFF" button.
7. When the menu appears, select "Weigh Vehicle" by pressing the "OK" button. Give the hand held a few seconds to start communication with the scale pads. When the red lights on ALL scale pads are blinking and numbers appear on the scaling screen the frequency has been changed and the scales are ready to use. If you find that one scale does not blink red after 2 minutes, simply turn that scale off and back on and press the reset button.
