web quantum computers use quantum bits or qubits which process information very differently while classical bits always represent either one or zero a qubit can be in a superposition of one and zero simultaneously until its state is measured

quantum computing wikipedia - Aug 23 2023

web in summary quantum computation can be described as a network of quantum logic gates and measurements however any measurement can be deferred to the end of quantum computation though this deferment may come at a computational cost so most quantum circuits depict a network consisting only of quantum logic gates and no measurements
