

Ford Motor Company Customer-Specific Requirements

For Use With ISO/TS 16949

Per ISO/TS 16949, an "organization" is the manufacturing facility being registered to ISO/TS 16949. The sub-tier supplier is the manufacturing facility directly contracted by the organization to ship product to the organization in support of a Ford Motor Company contract.

A sub-tier supplier hired by the organization to perform services not directly related to a Ford Motor Company contract (e.g. floor cleaning or grass cutting) is not impacted in any way by the sub-tier supplier development or other sub-tier supplier requirements stated in ISO/TS 16949.

In this document, the terms "organization" and "supplier" are interchangeable, both representing the company (or site) being registered to ISO/TS 16949.

1. Scope

ISO/TS 16949 and this document define the fundamental quality system requirements for Ford Motor Company suppliers. This document contains the company-specific requirements supplemental to **Technical Specification, ISO/TS 16949**. These supplemental requirements shall be included in the scope of the registration/certification audit in order to be recognized as satisfying the Ford Motor Company supplier criteria for third-party certification by an IATF recognized and contracted certification body.

ISO/TS 16949 is applicable to manufacturing sites of suppliers to Ford Motor Company (production and service parts and materials), and to assemblers of production parts or materials supplying to Ford Vehicle Assembly Plants.

Tooling & Equipment suppliers to Ford Motor Company are not eligible to be registered to ISO/TS 16949. Registration to ISO 9001 is acceptable. Semi-Conductor suppliers may register to ISO/TS 16949, providing they meet the scope requirements. . .

Service parts and materials applicability does not include aftermarket or remanufactured parts (See Definitions, "Organization").

All **ISO/TS 16949** requirements and the requirements of this document shall be addressed by the organization's quality system.

ISO/TS 16949 sanctioned interpretations are available on <http://www.iatfglobaloversight.org/>.

The US English language version of this document shall be the official version for purposes of third party registration.

Managing Quality Fads Robert E. Cole,1999-02-04

Can managers learn from fads That is the question Robert Cole addresses in this insightful book about the various factors supporting and inhibiting organizational learning A longtime student of the Japanese and American quality movements Cole focuses on the response of American industry to the

challenge posed in the early 1980s by high quality goods from Japan While most American managers view this challenge as slowly but successfully met many academics see the quality movement that emerged from it as just another fad In seeking to reconcile these two views Cole explores the reasons behind American industry s slow response to Japanese quality arguing that a variety of institutional factors inhibited management action in the early 1980s He then describes the reshaping of institutions that allowed American companies to close the quality gap and to achieve sustained quality improvements in the 1990s Hewlett Packard serves as an example of a company that made this institutional transition more effectively than most Cole describes Hewlett Packard s successful strategies while also pointing out the serious problems that it and other companies face as they attempt to adapt improve and go beyond Japanese practices He also uses Hewlett Packard an exemplar of the highly decentralized company to explore effective strategies for the creation dissemination and implementation of knowledge Unprecedented as a scholarly treatment of the quality movement *Managing Quality Fads* provides several important lessons for those interested in management decision making under conditions of uncertainty and organizational transformation in a rapidly changing business environment *Reengineering* V. Daniel Hunt,1995-05-23 The first practical guide to using reengineering to dramatically improve the development and success of new products Executives product development teams and engineering design groups will see how to consistently execute successful new product launches In a compelling clear fashion Hunt describes how companies can fully integrate their product development process by focusing on seven key initiatives They include process understanding broad based process reengineering establishing quality goals and multi functional teams using the right tools and techniques and implementing ongoing continuous improvement **TQM Engineering Handbook** D.H.
