Psychology of Career Adaptability, Employability and Resilience Kobus Maree, 2017-12-05 This book examines how the career counselling profession should respond to the changes in the world of work that have resulted from the increasing need to communicate faster and disseminate information more efficiently. It emphasizes the twin aims of enhancing a person's career adaptability and helping them to become more employable rather than linearly trying to find a job and remaining in one organisation for their entire career lives. The book shows that to achieve these aims, people need to acquire career resilience, especially since the world of work no longer provides workers with work holding environments for the duration of their career lives. It takes into account historical analyses which show that whenever major technological change has occurred and widespread job losses have ensued, people have managed to use the new technology to create new employment opportunities. Readers from career psychology and management research, vocational and professional career coaching and students of career psychology will find this book delivers sound, updated theory demonstrating how perceived threats in the 21st century can conceivably be turned into opportunities.

Crustal Evolution of Southern Africa A. J. Tankard, Martin Martin, K. A. Eriksson, D. K. Hobday, D. R. Hunter, W. E. L. Minter, 2012-12-06 Syntheses of the geology of major areas of the Earth's crust are increasingly needed in order that the features of and the problems associated with the secular evolution of the continents can be understood by a wide audience. Southern Africa is fortunate in having a remarkable variety of geological environments developed without many breaks over 3.8 Ga and many of the rock groups are household names throughout the geological world. In one respect the geology of Southern Africa is particularly important: cratonization clearly began as early as 3.0 Ga ago, in contrast to about 2.5 Ga in most other continental areas such as North America. This book documents very well the remarkable change in tectonic conditions that took place between the Early and Mid Precambrian; we have here evidence of the very earliest development of rigid lithospheric plates. This book is a tribute to the multitudes of scientists who have worked out the geology of Southern Africa over many years and decades. Whatever their discipline, each provided a step in the construction of this fascinating story of 3.8 Ga of crustal development. In the book, the reader will find a detailed review of the factual data together with a balanced account of interpretative models without the indulgence of undue speculation. One of its attractions is its multidisciplinary approach which provides a stimulating challenge to the reader.

Improving National Education Systems After COVID-19 Nuno Crato, Harry Anthony Patrinos, 2024-10-14 This open access book compares and analyses the results in twelve countries of the two latest international student assessments: Progress in International Reading Literacy Study 2021 (PIRLS) and the Programme for International Student Assessment 2022 (PISA) and tries to disentangle the effects of the pandemic from the long term trends.

in education It is one of the first or maybe the first published volumes to provide a global assessment of the devastating impact of the COVID 19 pandemic on student learning as measured by independent international comparative surveys The 12 countries discussed in this volume represent a wide variety of educational systems including Chile Ecuador England Estonia Italy the Netherlands Poland Portugal South Africa Spain and the United States It compiles diverse scenarios including countries that are high performers countries that perform at the OECD mean and countries that are struggling to attain the OECD average Each country has its history that reflects efforts to cope with pandemic school closures and to improve educational achievement A major topic discussed in this edited volume is related to understanding the diverse circumstances for the variations in results within different countries Why did learning loss in specific locations How much learning was lost Why is a country continuously declining Why is another country constantly improving Why is there higher or less levels of inequality How is a country regularly improving with an outdated curriculum Which policies have worked and which ones have not What can we do now This book is a valuable contribution to answer these concerns based on a diverse sample of countries and research questions

The Politics and Governance of Basic Education Brian Levy,Robert Cameron,Ursula Hoadley,Vinothan Naidoo,2018-08-24 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations All over the world economic inclusion has risen to the top of the development discourse A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education Using the vivid example of South Africa a country that had ambitious goals at the outset of its transition from apartheid to democracy it explores how the interaction of politics and institutions affects educational outcomes By examining lessons learned from how South Africa failed to achieve many of its goals it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re orient the system towards learning

Emerging Voices Human Sciences Research Council,Education Policy Consortium (South Africa),2005 This examination graphically illustrates the conditions that make dreams of a better life for all virtually unrealizable in rural areas of South Africa Through the voices of rural people themselves this study tells not only what the problems surrounding education are but also what can and should be done when the South African government launches its offensive against poverty in rural areas Rigorous and qualitative the text is an overview of the need of great numbers of people for the opportunities and capabilities that education can provide for their futures It also shows the existing situation of many impoverished populations worldwide and illustrates that poverty and inequality continue where such issues are not addressed
