Seattle Meth and Car Theft Tracy Marks, 2011-02-16 This is a story of how I got started on meth and how quickly things spun out of control until I was living on the streets, which eventually progressed into crime while living out of stolen cars. The cycle of drugs, crime, and prison goes on for years, finally I hit treatment. After treatment, I find success and a new way to live until I relapse, but I look at addiction through a new set of eyes. I humanized the addict but would never ask for the reader's sympathy because this is a story solely written to exploit the underground drug world and property crimes of addicts. This book is meant to give society a raw and uncut look into a car thief's world. Exposing reasons of why cars are stolen, how they are stolen, and what happens to cars after they are stolen. An inside look into street crime. This story is engaging from the very first page and leaves the reader always wanting more. Targeting anyone who has had someone close to them with a meth addiction and more importantly for those who live in cities and own a vehicle.

Firms, Contracts, and Financial Structure Oliver Hart,1995-10-05 This book provides a framework for thinking about economic institutions such as firms The basic idea is that institutions arise in situations where people write incomplete contracts and where the allocation of power or control is therefore important Power and control are not standard concepts in economic theory The book begins by pointing out that traditional approaches cannot explain on the one hand why all transactions do not take place in one huge firm and on the other hand why firms matter at all An incomplete contracting or property rights approach is then developed It is argued that this approach can throw light on the boundaries of firms and on the meaning of asset ownership In the remainder of the book incomplete contracting ideas are applied to understand firms financial decisions in particular the nature of debt and equity why equity has votes and creditors have foreclosure rights the capital structure decisions of public companies optimal bankruptcy procedure and the allocation of voting rights across a company s shares The book is written in a fairly non technical style and includes many examples It is aimed at advanced undergraduate and graduate students academic and business economists and lawyers as well as those with an interest in corporate finance privatization and regulation and transitional issues in Eastern Europe the former Soviet Union and China Little background knowledge is required since the concepts are developed as the book progresses and the existing literature is fully reviewed **The Assignment** Susan Grogan,2004-04 **"Don't Thank Me, Thank Your Recruiter"** Ken

Sound Moves Michael Bull, 2015-03-24 This innovative study opens up a new area in sociological and urban studies the aural experience of the social mediated through mobile technologies of communication Whilst we live in a world dominated by visual epistemologies of urban experience Michael Bull argues that it is not surprising that the Apple iPod a sound based technology is the first consumer cultural icon of the twenty first century This book in using the example of the Apple iPod investigates the way in which we use sound to construct key areas of our daily lives The author argues that the Apple iPod acts as an urban Sherpa for many of its users and in doing so joins the mobile army of technologies that many of us habitually use to accompany our daily lives Through our use of such mobile and largely sound based devices the book demonstrates how and why the spaces of the city are being transformed right in front of our ears
