Handbook of Research on Remote Work and Worker Well-Being in the Post-COVID-19 Era Wheatley, Daniel, Hardill, Irene, Buglass, Sarah, 2021-04-16 With the introduction of policies to combat COVID-19, far greater numbers of employees across the globe, including those with limited job autonomy, have moved to undertake their entire job at home. Although challenging in the current climate, embracing these flexible modes of work, such as working at home, including relevant investment in technology to enable this, will not only deliver potential organizational benefits but also increase the adaptability of the labor market in the short and longer terms. Although perhaps not the central concern of many in the current climate, good home-based work is achievable and perhaps even a solution to the current work-based dilemma created by COVID-19 and should be a common goal for individuals, organizations, and society. Research also has shifted to focus on the routines of workers, organizational performance, and well-being of companies and their employees, along with reflections on the ways in which these developments may influence and alter the nature of paid work into the post-COVID-19 era. The Handbook of Research on Remote Work and Worker Well-Being in the Post-COVID-19 Era focuses on the rapid expansion of remote working in response to the global COVID-19 pandemic and the impacts it has had on both employees and businesses. Going Remote - Guidline to build and manage remote teams Going Remote, #1 Bernhard Gaum, 2023-03-29 More companies are seriously considering and taking meaningful steps towards becoming not just remote friendly but all remote organizations The benefits of remote work are many That doesn't mean it's an ideal solution but I certainly believe is going to become the default not the exemption For example remote scenes can live and work all over the world Remote work automatically allows for a more flexible schedule and almost every level and in every role in the organization Not only do you lose your commute but you gain time for your family and time to live your life That comes with a mental shift So it's more effective to track results than attendance When you do that it creates more happiness and empowerment for your team members and as you'll learn in great detail soon distributed organizations must be intentional about creating a culture that includes everyone and makes employees feel valued and appreciated As the world responded to the COVID 19 pandemic people everywhere were forced into working from home While that was not at all what I think of when I talk about intentionally being remote It nonetheless helped me to see that operating as a distributed model is possible for many teams and many jobs In fact I wouldn't be surprised if many of the people reading this book are doing so because your organization is planning a remote transition after a trial period We're now seeing universities like Harvard Business School and NCED teaching remote strategies to business students It's without a doubt the next wave and whatever your reason is for reading this book you'll gain knowledge and skills that will be incredibly valuable to your team your organization and your career

The Impact of Management Control Systems on Employees' Behavior During Remote Work Lena Heinz-Schmitt, 2024-03-23 The new trend towards flexible work environments has spurred the debate over the effects of remote work on employees behavior and has forced greater consideration of how management control systems must be adjusted to meet the needs of the new work environment While the existing literature has observed several positive behavioral changes such as increased performance and effort counterproductive work behavior has also been identified Combining an experimental and a case study research approach the present study investigates whether a management

control system can mitigate unwanted behavior during remote work The experimental study manipulates the use of management controls and analyzes the effects of an enabling vs a coercive management control system on dishonest behavior The data reveal that individuals who perceive the system as enabling and feel a connection to the company behave more honestly during remote work The organizational connection entirely mediates the perception of the management control system on dishonest behavior To further investigate this effect a case study approach was applied Based on interviews several factors are identified that might impact the enabling perception of the control system in remote work settings The six factors are divided into situational and individual attributes
