White, 2022-06-01

While great strides have been made in the field of search and recommendation there are still challenges and opportunities to address information access issues that involve solving tasks and accomplishing goals for a wide variety of users Specifically we lack intelligent systems that can detect not only the request an individual is making what but also understand and utilize the intention why and strategies how while providing information and enabling task completion Many scholars in the fields of information retrieval recommender systems productivity especially in task management and time management and artificial intelligence have recognized the importance of extracting and understanding people s tasks and the intentions behind performing those tasks in order to serve them better However we are still struggling to support them in task completion e g in search and assistance and it has been challenging to move beyond single query or single turn interactions The proliferation of intelligent agents has unlocked new modalities for interacting with information but these agents will need to be able to work understanding current and future contexts and assist users at task level This book will focus on task intelligence in the context of search and recommendation Chapter 1 introduces readers to the issues of detecting

understanding and using task and task related information in an information episode with or without active searching This is followed by presenting several prominent ideas and frameworks about how tasks are conceptualized and represented in Chapter 2 In Chapter 3 the narrative moves to showing how task type relates to user behaviors and search intentions A task can be explicitly expressed in some cases such as in a to do application but often it is unexpressed Chapter 4 covers these two scenarios with several related works and case studies Chapter 5 shows how task knowledge and task models can contribute to addressing emerging retrieval and recommendation problems Chapter 6 covers evaluation methodologies and metrics for task based systems with relevant case studies to demonstrate their uses Finally the book concludes in Chapter 7 with ideas for future directions in this important research area
