The Ethics of Tax Evasion Robert W. McGee, 2011-12-21 Why do people evade paying taxes This is the central question addressed in this volume by Robert McGee and a multidisciplinary group of contributors from around the world Applying insights from economics public finance political science law philosophy theology and sociology the authors consider the complex motivations for not paying taxes and the conditions under which this behavior might be rationalized Applying theoretical approaches as well as empirical research The Ethics of Tax Evasion considers three general arguments for tax evasion 1 in cases where the government is corrupt or engaged in human rights abuses 2 where citizens claim inability to pay unfairness in the tax system paying for things that do not benefit the taxpayer excessively high tax rates or where taxes are used to support an unpopular war and 3 through philosophical moral or religious opposition The authors further explore these issues by asking whether attitudes toward tax evasion differ by country or other demographic variables such as gender age ethnicity income level marital status education or religion The result is a multi faceted analysis of tax evasion in cultural and institutional context and more generally a study in ethical dilemmas and rational decision making

by gaining insight into how to design transparent high quality tax reporting Assurance professionals can use information about the quality criteria of tax transparency Regulators can track historical development and see examples of voluntary tax transparency in companies reporting Scholars and students obtain theoretical framework for analysing the tax transparency phenomenon and the ability to distinguish between the concepts of tax transparency planning avoidance and evasion
