

TIPS FOR WRITING A PHILOSOPHY PAPER

Most of you have not written a philosophy paper before. Writing a philosophy paper is fundamentally unlike writing other sorts of papers.

What is a philosophy paper?

The best way to approach a philosophy paper is to look at it as a debate. First you are going to present someone else's view or views, and then you are going to critically evaluate it. In general there will be two parts to your paper: exposition and evaluation. The first part, exposition, involves you taking the view of the author or authors, recognizing the key elements, and putting those elements into your own words. The second part, evaluation, is harder. In the evaluation, you need to critique the views of the author.

Writing a philosophy paper

It is often difficult for students to write their first philosophy papers because they have been trained to write in ways that are counterproductive to writing good papers in philosophy. The most critical element in philosophy papers is to be clear and to the point. Every word should be necessary and help to further your goals. Particular guidelines:

1. Do not write introductions or conclusions. These never contribute any content to the overall paper and, given that you are writing such short papers, are unnecessary. Do not start your papers with otiose claims such as "Since the beginning of time man is contemplated the existence of God..." or "You could be Neo in the Matrix...". Rather, jump straight into your topic, your first sentence should be, for example, "In the *Meditations* Descartes argues...". At the end, rest with your final thoughts, do not summarize.
2. Do not write flowery, convoluted sentences such as "Descartes finds himself mired in a quandary in virtue of his marriage to the view that..." but rather "Descartes' position is problematic because..." In all cases, simplify! Many of you have been taught in English classes to use active verbs (e.g., explore, study) rather than passive verbs (e.g., is, was, were). In philosophy, you may use passive voice; it helps to simplify and clarify your writing.
3. You may and should write in first person. Particularly as you evaluate the articles, it's helpful to write that, for example, "I think that Descartes needs to say more about...". This shows that you are expressing your own thoughts.
4. Outlining: It is important for a good paper in philosophy to be well ordered. To that end, having an outline of your paper BEFORE you begin writing is very important. In most cases, the outline of your paper will be given in a broad form through the prompt. Generally the questions will be asked in a way that will track the dialectic of the course.
5. Drafts: You should have more than a final draft of your paper. That is, one key to a good paper is to not write it last minute. Believe it or not, it is painfully obvious to most professors when their students write their papers the night before. That is doubly true in philosophy. The trick to a good philosophy paper is to communicate very unambiguously, thoroughly and accurately. Most people are not unambiguous, thorough and accurate in their first take.
6. Citations: In most of the papers I will assign, you will not need to cite any sources. I will be asking you to summarize ideas we've discussed in class and then to give your own thoughts on the issue. Neither of those will necessarily involve research or the need to cite other works.

How To Write A Nursing Philosophy Paper:

The Nurse as Executive Barbara Stevens Barnum, Karlene M. Kerfoot, 1995 This new edition of Aspen's bestselling book *The Nurse as Executive* has been thoroughly revised and updated to reflect the significant changes in nursing management. The nurse executive's role as a member of the executive team is examined as well as the nurse executive's role in health care issues such as quality outcomes, team building, and cost containment. Organizing the book around the new resource-driven management model rather than the goal-driven management model makes this book unique and distinguishes it from other management texts.

Role Development in Professional Nursing Practice Kathleen Masters, 2014 Covers the role development of the professional nurse as it occurs in four developmental stages: The Nurse as Individual Nurse-Client Relationships, The Nurse as a Member of the Health Care Team, and the Nurse as a Professional Member of Society.

Reference Guide to Writing Across the Curriculum Charles Bazerman, Joseph Little, 2005-07-04 This reference guide traces the writing across the curriculum movement from its origins in British secondary education through its flourishing in American higher education and extension to American primary and secondary education.

Role Development in Professional Nursing Practice Masters, 2015-11-18 *Role Development in Professional Nursing Practice* Third Edition examines the progression of the professional nursing role and provides students with a solid foundation for a successful career. This essential resource includes recommendations from current research and utilizes a comprehensive competency model as its framework. Key features incorporate the Nurse of the Future, NOF Nursing Core Competencies based on the AACN's Essentials of Baccalaureate Education, the IOM's Future of Nursing report, and QSEN competencies throughout the text. Key competencies highlight knowledge, skills, and attitudes (KSA) required of the professional nurse. Includes new case studies and content congruent with recommendations from the Carnegie Foundation and the Institute of Medicine. Provides updated information on evidence-based research, informatics, legal issues, the healthcare delivery system, and future directions. Cover p 4

Creating a Caring Science Curriculum, Second Edition Marcia Hills, Jean Watson, Chantal Cara, 2021-01-07 The hallmark text for nursing faculty seeking to promote the transformative teaching of caring science, *Creating a Caring Science Curriculum: A Relational Emancipatory Pedagogy for Nursing* reflects the paramount scholarship of caring science educators. This second edition intertwines visionary thinking with blueprints, exemplars, and dynamic direction for the application of fundamental principles. It goes beyond the conventional by offering a model that serves as an emancipatory, ethical, philosophical, educational, and pedagogical learning guide for both teachers and students. Divided into five units, the text addresses the history of the caring curriculum revolution and its powerful presence within nursing. Unit I lays the foundation for a caring science curriculum. Unit II introduces intellectual and strategic blueprints for caring-based education, including action-oriented approaches for faculty-student relations, teaching-learning skills, pedagogical practices, critical reflective creative approaches to evolving human consciousness, and power relation dynamics. Unit III addresses curriculum structure.

T. McGregor,2017-10-25 Understanding and Evaluating Research A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question the use of theory in the study the methods used and how the outcomes are reported The book starts with what it means to be a critical and uncritical reader of research followed by a detailed chapter on methodology and then proceeds to a discussion of each component of a research article as it is informed by the methodology The book encourages readers to select an article from their discipline learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report **Nursing Theory, Postmodernism, Post-structuralism, and Foucault** Olga Petrovskaya,2022-09-30 Nursing Theory Postmodernism Post structuralism and Foucault critiques mainstream American nursing theory and its use of post structural theory comparing and contrasting how postmodern and post structural ideas have been used fruitfully in nursing research and theorizing elsewhere In the late 1980s references to post structuralism and Michel Foucault started to appear in nursing journals Since then hundreds of nursing publications have cited postmodernism and key post structural ideas such as power knowledge discourse and de centring the human subject In Nursing Theory Postmodernism Post structuralism and Foucault Olga Petrovskaya argues that the application of these ideas is markedly different in American nursing theory scholarship compared to nursing theoretical scholarship generated outside the canon of unique nursing theory Analysing relevant literature from the late 1980s through 2010s she demonstrates this difference arguing that American nursing theory calcified into a matrix of dogmas built on logical positivism wary of borrowed theory and loyal to a unique nursing science Post structural ideas that fit the matrix such as criticism of medicine are sanctioned whereas ideas sceptical of humanistic agendas including those that challenge American nursing theory are rendered meaningless In contrast other nurse scholars

from Britain Australia Canada and what the author calls the American enclave group engaged with postmodern and post structural perspectives to enrich their research and invite readers to rethink nursing practice The book showcases examples of their intelligent creative theorizing Arguing that American nursing theory enervated nursing theorizing Petrovskaya calls for opening this matrix to theoretical and methodological creativity less rigid categories of scholarship and healthy self examination Making the case that post structural ideas are vital for nurses ability to critically reflect on their discipline and profession this is a necessary read for all those interested in nursing theory philosophy and praxis Chapter 1 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
