Testable JavaScript Mark Trostler, 2013-02-15 That's right: JavaScript code is testable despite the lack of unit test standards for this language. With this book, you'll discover how to devise excellent tests and real-world testing plans for your existing JavaScript code. Developers starting out on a new project will greatly benefit from these guidelines. Testing a language that runs within many different implementations and environments is inherently difficult, and since most JavaScript environments are UI-based, automated testing becomes even more difficult. This guide shows developers and their managers how to overcome these problems to test JavaScript code efficiently. Topics include: Which types of JavaScript testing are most effective? When and why should you run tests on JavaScript code? Code patterns and anti-patterns that promote and inhibit JavaScript testing. Integrating unit tests with your development and build environments. Automated test running and reporting. Code coverage: how to get it, interpret it, and automatically generate it.

[Full Stack Web Development with Backbone.js](#) Patrick Mulder, 2014-06-10 Learn how to build a full-stack application with Backbone.js by taking advantage of JavaScript modules, workflow automation, and Backbone's interface building blocks. With this practical guide, author Patrick Mulder takes experienced backend developers and JavaScript programmers through the steps necessary to create a fully functional single-page application. Backbone's rich ecosystem of plugins makes applications easier to design and scale, but knowing which tools to use for your project can be tricky. How do you combine views and the data layer with Backbone or serve and deploy JavaScript assets? You'll not only learn the answers to these and many other questions; you'll also discover Backbone's vast number of use cases. Get started quickly by using a Backbone.js and Browserify. Track state and organize data with Backbone models and collections. Capture events from users by using views and manipulating the DOM. Combine Backbone views with advanced HTML templates. Use Backbone to browse remote data sources from an API. Authenticate and authorize client-side interactions. Build a backend API with Node.js and Restify. Set up workflow automation with Bower, Grunt, Yeoman, and RequireJS.
