Handbook on the Neuropsychology of Aging and Dementia Lisa D. Ravdin, Heather L. Katzen, 2012-09-14

With the aging of the baby boomers and medical advances that promote longevity older adults are rapidly becoming the fastest growing segment of the population As the population ages so does the incidence of age related disorders Many predict that 15% 20% of the baby boomer generation will develop some form of cognitive decline over the course of their lifetime with estimates escalating to up to 50% in those achieving advanced age Although much attention has been directed at Alzheimer s disease the most common form of dementia it is estimated that nearly one third of those cases of cognitive decline result from other neuropathological mechanisms In fact many patients diagnosed with Alzheimer s disease likely have co morbid disorders that can also influence cognition i e vascular cognitive impairment suggesting mixed dementias are grossly under diagnosed The Clinical Handbook on the Neuropsychology of Aging and Dementia is a unique work that provides clinicians with expert guidance and a hands on approach to neuropsychological practice with older adults The book will be divided into two sections the first addressing special considerations for the evaluation of older adults and the second half focusing on common referral questions likely to be encountered when working with this age group The authors of the chapters are experts and are recognized by their peers as opinion leaders in their chosen chapter topics The field of neuropsychology has played a critical role in developing methods for early identification of late life cognitive disorders as well as the differential diagnosis of dementia Neuropsychological assessment provides valuable clinical information regarding the nature and severity of cognitive symptoms associated with dementia Each chapter will reinforce the notion that neuropsychological measures provide the clinician with sensitive tools to differentiate normal age related cognitive decline from disease associated impairment aid in differential diagnosis of cognitive dysfunction in older adults as well as identify cognitive deficits most likely to translate into functional impairments in everyday life

Buried Structures Dr P S Bulson, 1984-12-20

Much of the infrastructure of modern society is buried below ground Pipeline conduits and culverts carry the services on which our economies depend and the strength and resilience of such structures is of vital importance Larger underground construction is becoming more common in cities and towns and in defence installations This book brings together the store of theoretical analytical experimental and design based knowledge that has been built up on the subject of buried structures The author discusses the principles of soil arching stress distribution and soil properties as well as the design problems of static and

dynamic loads strength and safety The stability of thin walled buried structures receives particular attention as does the behaviour of underground construction under localized and nuclear explosions Test facilities and design codes of practice are reviewed and the range of structures discussed in the book extends from thick and thin walled culverts conduits and water pipelines to arches domes spherical shells vertical capsules blast shelters and thin walled road tunnels

Statistically-Driven Computer Grammars of English ,2023-11-20 This book is about building computer programs that parse analyze or diagram sentences of a real world English The English we are concerned with might be a corpus of everyday naturally occurring prose such as the entire text of this morning s newspaper Most programs that now exist for this purpose are not very successful at finding the correct analysis for everyday sentences In contrast the programs described here make use of a more successful statistically driven approach Our book is first a record of a five year research collaboration between IBM and Lancaster University Large numbers of real world sentences were fed into the memory of a program for grammatical analysis including a detailed grammar of English and processed by statistical methods The idea is to single out the correct parse among all those offered by the grammar on the basis of probabilities Second this is a how to book showing how to build and implement a statistically driven broad coverage grammar of English We even supply our own grammar with the necessary statistical algorithms and with the knowledge needed to prepare a very large set or corpus of sentences so that it can be used to guide the statistical processing of the grammar s rules **EPA Publications**
