**Primary Mathematics for Trainee Teachers** Marcus Witt, 2014-11-19 With chapter sequencing following the new Curriculum, this book supports trainee Primary school teachers to make use of the opportunities presented in the new National Curriculum for effective and engaging Mathematics teaching. Covering all of the areas of the new Curriculum for primary mathematics and offering insight into effective teaching, this book helps students connect what they need to teach with how it can be taught. Exploring opportunities in the new curriculum for creative and imaginative teaching, it shows readers how to capitalize on opportunities to develop children's reasoning and problem-solving skills. It explores how to make links between mathematics and children's lived experiences to enhance their learning and enables trainees to develop an ability to plan with discernment, making the most of existing thinking and research as well as building confidence in adapting and customizing ideas. Includes the full National Curriculum Programme of Study for Maths, key stages 1 and 2, as a useful reference for trainee teachers. Other books in this series include *Primary English for Trainee Teachers* *Policy-Making in the GCC* Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post-2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states, especially Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates, and the growth of the GCC as a collective entity, surprisingly little attention has been paid to the actual mechanics of policy-making in the region. This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf and the era of low oil prices. Both developments, along with dramatic demographic change, have compelled states and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy. The book shows how academic, social, and economic institutions are responding to the increasingly complex process of decision-making where citizens demand better services and further empowerment and states are obliged to seek wider counsel, although wanting to retain ultimate authority. With

contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike

This book's overriding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education training and which provides a critical overview of the state of this domain, including emerging and cutting-edge issues, as a foundation for facilitating improved accounting education training, scholarship and research in order to enhance the educational base of accounting practice. The Routledge Companion to Accounting Education highlights the key drivers of change, whether in the field of practice on the one hand, e.g. increased regulation, globalisation, risk and complexity, or from developments in the academy on the other, e.g. pressures to embed technology within the classroom or to meet accreditation criteria on the other. Thirty chapters written by leading scholars from around the world are grouped into seven themed sections which focus on different facets of their respective themes, including student curriculum, pedagogic and assessment considerations.
