Kidney Dissection Lab

In this lab activity fresh pig kidneys will be dissected. Hygiene is crucial when dealing with fresh specimens. Vinyl gloves will be provided and hand washing with soap and warm water must be performed before leaving the class.

Evaluation

You will be evaluated based on the following criteria:

1. **Respect** for the specimen you are studying. If you treat the specimen in a disrespectful way, you will be removed from the lab and assigned a mark of 0.
2. **Safety**. Your lab coats should be cleaned, dried and returned at the end of the class. Your group is solely responsible for your scalpel. Show your equipment to the teacher before returning it to the cart. Always wash your hands and your work area when you are finished. Handle dissecting tools carefully (don't cut directly towards yourself or your lab partner(s)). You should wear gloves and safety goggles. Lab aprons are available if you choose to use them.
3. **Participation**. Every member of your team should contribute to learning from the dissection.
4. **Careful dissections**. Try to follow all directions to the best of your ability, and to cut carefully in order to observe whole organs. Use your reference materials and/or the teacher to assist you.
5. **Dispose**. Any tissues removed should be placed in a special garbage bag, not down the sink or in the regular garbage.
6. **Checkup questions**. At the end of the activity, the teacher will have questions to ask you about the actual dissection (eg. Where is the renal capsule? What is this dark red mass?) Each person in your group will have to answer one or more questions. Call the teacher over by raising your hand when your group is ready for the questions.
* It is YOUR GROUP'S RESPONSIBILITY to ensure that you get a chance to answer these questions before your disposal of your specimens!
7. **Lab report**. For this activity, the report will consist only of biological drawings and answers to questions in this handbook. Each student will hand in their own report.

Background Information

The human urinary system consists of two kidneys, two ureters, one urinary bladder, and one urethra. This system has two basic functions, both of which occur in the kidneys. The first function is to remove nitrogenous wastes (such as creatine, urea, and uric acid) from the body. The second function is to maintain the ion, pH, and water levels in the blood. One product of these processes is urine, a pale yellow fluid containing water, and particles such as urea, sodium, potassium, creatine, and uric acid. Urine moves from the kidneys to the urinary bladder via the ureters, which are essentially tube-shaped extensions of the renal pelvis. Urine is stored in the urinary bladder until it leaves the body via the urethra.

second edition of Handbook of Autopsy Practice appeared in 1979 under the title Current Methods of Autopsy Practice W B Saunders Company that edition was out of print in the early 1980s Now over 20 years later it appeared timely to thoroughly update the material in a third edition by adding what we have learned in the meantime and eliminating text that has become obsolete There is an acute need for a complete and readily accessible resource for autopsy work because few pathologists still specialize in autopsy practice and as a consequence expertise in autopsy technology and autopsy pathology has declined Our colleagues in the forensic field have remained the only large group of autopsy practitioners For most other pathologists the economic situation time constraints and the steadily decreasing autopsy rates have made a career in autopsy pathology unattractive This state of affairs is perpetuated by a lack of interest among many of our young colleagues partly because the teaching of autopsy pathology and autopsy techniques during most residencies is insufficient Numerous articles have been written about this situation but the trend I fear is irreversible Still autopsies will be requested particularly in complex and difficult situations where the questions remaining after the death of the patient might challenge even experienced autopsy pathologists Under these circumstances this Handbook of Autopsy Practice should meet a particular need by providing the prosecutor with a source of information when it is most required in the autopsy room

The Top Books of the Year Kidney Dissection Lab Report Procedure The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Kidney Dissection Lab Report Procedure : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
