Triality Versus Duality

This book will first cover some of the advantages and disadvantages of duality and triality to prepare the reader to understand the distinct benefits of the 5 Thinking Positions 5TP over duality and triality

Duality can be understood as an improvement over thinking everything is one sided because duality sees a two sided reality

Triality can be recognized as an improvement in thinking everything is two sided because triality sees a three sided reality

5TP can be understood as advanced thinking where everything is three sided because 5TP sees a five sided reality

Continuum Thinking

The 5TP can be understood as the primary form of a continuum or as a form of continuum thinking instead of as another form of dualistic thinking

The purpose of using the 5TP is to identify how reality appears from different viewpoints such as in the duality of the glass half empty vs the glass half full scenario which does not affect how much water is objectively in the glass just the perspective with which that water is viewed

Some possible viewpoints are the glass is half full the glass is half empty the glass has room to add other ingredients half full is more than enough half full is too much half full is too little it is what it is
