California Builder & Engineer ,1998 **Contractors and Engineers Magazine** ,1973 Contractors & Engineers Magazine ,1974 *Neuromorphic Engineering Systems and Applications* André van Schaik,Tobi Delbruck,Jennifer Hasler,2015-07-05 Neuromorphic engineering has just reached its 25th year as a discipline In the first two decades neuromorphic engineers focused on building models of sensors such as silicon cochleas and retinas and building blocks such as silicon neurons and synapses These designs have honed our skills in implementing sensors and neural networks in VLSI using analog and mixed mode circuits Over the last decade the address event representation has been used to interface devices and computers from different designers and even different groups This facility has been essential for our ability to combine sensors neural networks and actuators into neuromorphic systems More recently several big projects have emerged to build very large scale neuromorphic systems The Telluride Neuromorphic Engineering Workshop since 1994 and the CapoCaccia Cognitive Neuromorphic Engineering Workshop since 2009 have been instrumental not only in creating a strongly connected research community but also in introducing different groups to each other s hardware Many neuromorphic systems are first created at one of these workshops With this special research topic we showcase the state of the art in neuromorphic systems **NUREG/CR**. U.S. Nuclear Regulatory Commission,1980 **Advances in Fluid-Structure Interaction** Marianna Braza,Alessandro Bottaro,Mark Thompson,2016-04-07 This book addresses flow separation within the context of fluid structure interaction phenomena Here new findings from two research communities focusing on fluids and structures are brought together emphasizing the importance of a unified multidisciplinary approach The book covers the theory experimental findings numerical simulations and modeling in fluid dynamics and structural mechanics for both incompressible and compressible separated unsteady flows There is a focus on the morphing of lifting structures in order to increase their aerodynamic and or hydrodynamic performances to control separation and to reduce noise as well as to inspire the design of novel structures The different chapters are based on contributions presented at the ERCOFTAC Symposium on Unsteady Separation in Fluid Structure Interaction held in Mykonos Greece 17 21 June 2013 and include extended discussions and new highlights The book is intended for students researchers and practitioners in the broad field of computational fluid dynamics and computational structural mechanics It aims at supporting them while dealing with practical issues such as developing control strategies for unsteady separation and applying smart materials and biomimetic approaches for design and control **Der Kalvarienberg in Feldafing** Daniel Bernhard,2004-07-19 Inhaltsangabe Einleitung Die Arbeit unterteilt sich in drei Kapitel die Darstellung der geschichtlichen Entwicklung die Bestandsaufnahme und die Entwicklung der zur Instandsetzung und Erhaltung notwendigen Maßnahmen Ziel war es zunächst das bestehende Inventar im derzeitigen Status festzuhalten und darauf basierend eine Pflege und Entwicklungskonzeption zu erstellen F r
