1 Introduction

LaTeX is a high-quality typesetting system which includes features designed for the production of technical and scientific documentation. LaTeX originally written by Leslie Lamport (Koenker, 2009). While preparing a LaTeX document, it is often necessary to cite and reference a source using a standard author-date or numbered referencing system (van Dongen, 2012, p.135). Bibliographic lists can be maintained in an external database, with citation of entries from the database specified through symbolic means.
