Changing Cultures in Higher Education Ulf-Daniel Ehlers, Dirk Schneckenberg, 2010-03-10 More and more educational scenarios and learning landscapes are developed using blogs, wikis, podcasts and e-portfolios. Web 2.0 tools give learners more control by allowing them to easily create, share or reuse their own learning materials and these tools also enable social learning networks that bridge the border between formal and informal learning. However, practices of strategic innovation of universities, faculty development, assessment, evaluation and quality assurance have not fully accommodated these changes in technology and teaching. Ehlers and Schneckenberg present strategic approaches for innovation in universities. The contributions explore new models for developing and engaging faculty in technology-enhanced education and they detail underlying reasons for why quality assessment and evaluation in new and often informal learning scenarios have to change. Their book is a practical guide for educators aimed at answering these questions. It describes what E-learning 2.0 is, which basic elements of Web 2.0 it builds on and how E-learning 2.0 differs from Learning 1.0. The book also details a number of quality methods and examples such as self-assessment, peer review, social recommendation and peer learning using illustrative cases and giving practical recommendations. Overall, it offers a step-by-step guide for educators so that they can choose their own quality assurance or assessment methods or develop their own evaluation methodology for specific learning scenarios. The book addresses everyone involved in higher education: university leaders, chief information officers, change and quality assurance managers and faculty developers. Pedagogical advisers and consultants will find new insights and practices for the integration and management of novel learning technologies in higher education. The volume fosters in lecturers and teachers a sound understanding of the need and strategy for change and it provides them with practical recommendations on competence and quality methodologies. *Universities and Students* G.R. Evans, Jaswinder Gill, 2013-09-13 Legal actions by students against universities are growing in number and the issues such actions raise are becoming a major concern for both teaching and administrative staff. This handbook is designed to clarify the legal framework that binds the student with the university or college. False Feathers Debora Weber-Wulff,2014-05-13 Since human beings have been writing it seems there has been plagiarism It is not something that sprouted with the advent of the Internet Teachers have been struggling for years in countries all over the globe to find good methods for dealing with the problem of plagiarizing students How do we spot plagiarism How do we teach them not to plagiarize And how do we deal with those who have been found out to be plagiarists

The purpose of this book is to collect material on the various aspects of plagiarism in education with special attention given to the German problem of dissertation plagiarism. Since there is a wide spread interest in the German plagiarism situation and in strategies for dealing with it the book is written in English in order to be accessible to a larger audience.
