

Magnavox

General

The R220 Series Radio Chassis are self-contained AM-FM and FM-Stereo radio chassis utilizing transistors throughout. These chassis are designed to provide either 30W or 50W (MPO-ELA) output depending upon chassis version.

All circuitry is contained on one printed circuit board with the audio output transistors mounted on a vertical bracket. A special socket is used to make the necessary connections from the power transistors to the printed circuit board.

Chassis Identification

These chassis are identified by a label located on the chassis. The first three digits (220) identify the basic chassis series. The next two digits (01) identify the version within the series. The last two letters (AA) are used to identify production changes. Any correspondence pertaining to R220 chassis must contain the complete chassis number (i.e. R220-01-AA).
