Free Clinics Virginia M. Brennan, 2013-05-15 Free clinics and student run clinics are an essential part of America's health care safety net. In community after community, pro bono and student run health clinics have sprung up over the past 30 years providing critically needed care to medically underserved populations. Free Clinics is a mosaic formed by accounts of such clinics around the United States. These wide ranging narratives from urban to rural from primary care to behavioral health care provide examples that will assist other communities seeking to find the model that best fits their needs. The Patient Protection and Affordable Care Act has improved access to health care for many Americans but millions remain and will remain uninsured or underinsured. Free clinics provide non emergency care to those in need. Nationwide professionals can be found offering volunteer services at these clinics. Contributors to this volume typically people with personal familiarity as clinicians or area residents with the clinics they write about cover a variety of topics including a review of the literature, data driven accounts of clinic usage and ethical guidelines for student run clinics. They describe the motivations of clinic staff, the day to day work of a family nurse practitioner working in clinics and teaching at a university, the challenges and rewards of providing health care for homeless people and more. Student run clinics are the topic of the second section in addition to providing care to a small subset of those in need, student run clinics are an important venue for training future clinicians and helping the seeds of altruism with which many enter their professions to germinate. Free Clinics will be useful to policymakers, students and faculty in public health and health policy programs and clinicians and students who are embarking on launching new clinics.

Maine Politics and Government Kenneth T. Palmer, 2009-12 Remote and thinly populated Maine was long insulated from many of the demographic and economic trends of states to the south. Maine Politics and Government traces recent changes in the state's system as agriculture, manufacturing and maritime trades have ceded dominance to high tech businesses, extensive commercial development and an expanding governmental sector. This compact overview of Maine politics and government describes how the state's history and political culture have shaped its political processes, its governing institutions and its public policy priorities. It also highlights the shift in the role of Maine's governments in the past half century from low service entities to administrators of a broad range of public policies. The authors consider the impact of the influx of newcomers along the southern Maine coast, serious financial issues involving burdensome taxation, the pressing need to make the nearly five hundred units of local government more efficient and problems attending the spread of suburbs throughout the state. Fully updated and expanded, this second edition provides a wealth of new material, maps, case studies, updated demographic information, treatment of new policies and health care plans and an overview of the administrations of the two most recent governors. *Clearinghouse Review*, 1989

Contingencies, 2004 **Maine Revised Statutes Annotated, 1964** Maine, 1964 **An Introduction to Health Policy** Manish K. Sethi, William H. Frist, 2013-08-04 Based on the current climate of our nation's finances and healthcare

spending it is clear that young doctors and medical students are likely to see a dramatic transformation of the manner in which America offers medical care to its citizens over the course of their careers. As such it is pivotal that the next generation of America's leaders on the front lines of medicine develop a sense of where healthcare has evolved from and future potential directions of change. *An Introduction to Health Policy: A Primer for Physicians and Medical Students* is the first of its kind: a book written by doctors for doctors in order to allow busy physicians and medical students to quickly develop an understanding of the key issues facing American healthcare. This book seeks to efficiently and effectively educate physicians and medical students in a clinical context that they can understand on the past, present and potential future issues in healthcare policy and the evolution of American healthcare. The reader will walk away from the book with the ability to discuss the fundamental issues in American healthcare with ease. **A Pound of Prevention** Jonathan Kotch, 1992

House Legislative Record of the ... Legislature of the State of Maine Maine. Legislature, 2005 Medicaid and SCHIP recent HHS approvals of demonstration waiver projects raise concerns., 2002. States provide health care coverage to about 40 million low income uninsured adults and children largely through two federal state programs: Medicaid and the State Children's Health Insurance Program (SCHIP). Medicaid generally covers low income families and elderly and disabled individuals while SCHIP provides health coverage to children in families whose incomes while low are above Medicaid's eligibility requirements. To receive federal funding which covered on average about 57 percent of Medicaid expenditures and 72 percent of SCHIP expenditures in 2001, states must meet certain statutory requirements including providing a certain level of benefits to specified populations. Under section 1115 of the Social Security Act, the Secretary of Health and Human Services (HHS) can waive many of the statutory requirements in the case of experimental pilot or demonstration projects that are likely to promote program objectives. As part of their responsibility to protect the fiscal integrity of the programs, traditionally HHS and the Office of Management and Budget (OMB) have had a policy that all approved waiver projects be budget neutral for the federal government; that is, the proposed project cannot result in federal expenditures that are higher than they would have been without the project. **The Bottom Line Book of Freebies**, 2004 **Major Health Care Policies** Health Policy Tracking Service, 1999 *Annual Meeting of the American Public Health Association and Related Organizations* American Public Health Association, 1989 **Maine Health Program Rules** Maine.
