It is something that most people don't think much about because their diets consist generally of eating foods that are easy and fast so that they can enjoy having more time to themselves. The problem is that these foods have a lot more issues than the average person would think about because the things that make clean foods not so clean are the added ingredients. When a food is packaged and processed to have a long shelf life this usually means that there are a lot of added chemicals that go into making these foods. Normally fresh food only stays good for a certain amount of time within the range of days to weeks and in certain rare occasions months. Millenniums ago a man deciding to build a garden was fortunate because he had all that land right outside his door All he had to do is clear out a piece of land and mark it with a boundary wall After that he could go hunting for attractive looking plants in the wild and bring them back home With a little bit of care and cherishing he would soon have a tame garden of his own But today a large number of us are not so fortunate Space is at a premium Concrete jungles have taken the place of what was once nature s backyard And that is why man is looking for easy options to bring beautiful greenery inside his limited space And so this book is for all those who want to know more about indoor plants how to grow them how to take care of them which are the best plant varieties which flourish indoors and tips and techniques with which you can enjoy not only a relaxing hobby but also greenery around you Until just after the Second World War indoor household plants were limited to ferns palms and potted plants which flowered in season Surely plants like aspidistras were also popular for interior decoration but soon more and more wide ranging varieties and species of foliage parted plants began to be known to keen gardeners This change is due chiefly to the architects who designed postwar buildings on severe lines Gone were the rambling houses with huge gardens Strictly utilitarian designs were utilized by architects to design these houses and flats Frankly speaking most of them were chicken coops The introduction of houseplants in a large variety of colors and fonts provided a flash of color to those austere and severe designs You could relieve the simplicity and the austerity of the home by growing houseplants indoors Thanks to the improved heating and lighting systems many varieties which were once grown in hot houses greenhouses and conservatories would now flourish indoors as houseplants There are many plants which are easier to grow and last for several years
