1 INTRODUCTION

1.1 Purpose of the CT Study Instruction Manual

The purpose of this instruction manual is to help you complete original and revised CT studies for your treatment plant using the CT Template.

1.2 What Systems Can Use the New Automated CT Study Template?

The Template is primarily intended for small and medium size treatment plants. The template is designed for treatment plants with no more than 10 disinfection zones, each zone consisting of no more than 10 treatment units. If your plant does not meet these requirements, your CT study will need to be completed manually.

1.3 How Is This Instruction Manual Organized?

Table 1-1 gives a summary of the chapters in this manual and what they cover.

Table 1-1: CT Study Template Guidance Manual Chapters

The authors move beyond the current definition of sustainability in architecture which tends to focus on energy efficiency to include guidance for architecture that promotes social cohesion personal health renewable energy sources water and waste recycling systems permaculture energy conservation and crucially buildings in relation to their place The authors offer a holistic approach to sustainable architecture and authoritative technical advice on How to design and construct healthy buildings through choosing suitable materials healthy service systems and designing a healthy and comfortable indoor climate including solutions for avoiding

problems with moisture radon and noise as well as how to facilitate cleaning and maintenance How to design and construct buildings that use resources efficiently where heating and cooling needs and electricity use is minimized and water saving technologies and garbage recycling technologies are used How to close organic waste sewage heat and energy cycles For example how to design a sewage system that recycles nutrients Includes a section on adaptation of buildings to local conditions looking at how a site must be studied with respect to nature climate and community structure as well as human activities The result is a comprehensive thoroughly illustrated and carefully structured textbook and reference Code Requirements for Structural Concrete (ACI 318-08) and Commentary ACI Committee 318, American Concrete Institute, 2008 The guality and testing of materials used in construction are covered by reference to the appropriate ASTM standard specifications Welding of reinforcement is covered by reference to the appropriate AWS standard Uses of the Code include adoption by reference in general building codes and earlier editions have been widely used in this manner The Code is written in a format that allows such reference without change to its language Therefore background details or suggestions for carrying out the requirements or intent of the Code portion cannot be included The Commentary is provided for this purpose Some of the considerations of the committee in developing the Code portion are discussed within the Commentary with emphasis given to the explanation of new or revised provisions Much of the research data referenced in preparing the Code is cited for the user desiring to study individual questions in greater detail Other documents that provide suggestions for carrying out the requirements of the Code are also cited
