Essig,2017-05-26 Some theoreticians contemplate and formulate the physics of tachyons which are hypothetical particles
that would always travel faster than light but which could never slow down to the speed of light just as they anticipate
sublight speed massive particles never being able to achieve light speed So my theoretical work on the physics and
kinematics of light speed massive systems sets me apart from general trends in the theoretical field of relativistic
astronautics This book is a continuation of how and why we may be able to at some future time travel at the speed of light
