Warner, 2015-06-05 This book fills a significant gap in the critical conversation on race in media by extending interrogations of racial colorblindness in American television to the industrial practices that shape what we see on screen. Specifically, it frames the practice of colorblind casting as a potent lens for examining the interdependence of 21st century post-racial politics and popular culture. Applying a production as culture approach to a series of casting case studies from American primetime dramatic television, including ABC's *Grey's Anatomy* and The CW's *The Vampire Diaries*, Kristen Warner complicates our understanding of the cultural processes that inform casting and expounds the aesthetic and pragmatic industrial viewpoints that perpetuate limiting or downright exclusionary hiring norms. She also examines the material effects of actors of color who knowingly participate in this system and justify their limited roles as a consequence of employment, and finally speculates on what alternatives, if any, are available to correct these practices. Warner's insights are a valuable addition to scholarship in media industry studies, critical race theory, ethnic studies, and audience reception, and will also appeal to those with a general interest in race in popular culture. **How's the Weather in Spring?** Jenna Lee Gleisner, 2014-01-01

BK Channels: Integrators of Cellular Signals in Health and Disease Thomas M. Weiger, Alex Dopico, Anton Hermann, 2017-11-10 Maxi calcium activated potassium channels BK are an amazing category of ion channels which are found in cellular plasma membranes as well as in membranes of intracellular organelles The function of these channels is to repolarize any excited membrane by passing a potassium outward current in response to depolarization and or increase in local calcium levels Thus voltage and calcium ions are involved in gating the channel under physiological conditions This dual activation makes them perfect sensors for many cellular events that require integration between intracellular calcium levels and electrical signals A plethora of physiological and pathophysiological functions such as membrane hyperpolarization modulation of synaptic transmission hormone secretion or mental deficiencies vaso regulation epilepsies heart diseases myotonic dystrophies hypertension etc in almost all cells and tissues were reported for these channels BK channels are main targets for important ligands like alcohol and gaseous neurotransmitters such as NO CO or H<sub>2</sub>S to name a few In the last years the molecular entities and mechanisms involved in modulation of BK channels have gained tremendous attention as the key role of these channels in cellular processes became increasingly recognized Indeed accessory proteins such as slo and beta

and gamma subunits all serve to modulate the channel gating characteristics Moreover channel subunit expression and function is further tuned by phosphorylation dephosphorylation processes redox mechanisms and the lipid microenvironment of the BK channel protein complex This e book contains structural and functional aspects of BK channels channel modulation by a variety of agents and cellular components as well as the channel s relevance in health and disease What Blossoms in Spring? **Uncovering the Crimes of Urbanisation** Kristian Lasslett,2017-11-20 From the social cleansing of cities through to indigenous land struggles at the frontline of extraction megaprojects planetary urbanisation is a contested process that is radically shaping social life and the sustainability of human civilisation In this pioneering intervention it is maintained that this turbulent planetary process is also a potent space for state corporate criminality Market manipulation fraud corruption violence and human rights abuses have become critical spokes in the way space is being transformed to benefit speculative interests This book not only offers investigative data that documents in detail the intricate ways state and corporate actors collude to profit from the built environment it also establishes the tools for building a research agenda that can interrogate the crimes of urbanisation on a comparative longitudinal basis The author sets out an investigative methodology which can be appropriated to conduct probing research into the hidden schemas and forms of collusion that buttress state corporate criminality in the urban sphere Coupled to this a theoretical framework is developed for thinking about the networks processes and mechanisms at the heart of property market manipulation and the broader social relationships that sustain

and reward illicit speculative activity This book concludes that researchers and civil society have a critical role to play in challenging a historical form of planetary urbanisation marked by endemic state corporate criminality that poses significant threats to the sustainability of lived communities and the rich biospheres that they depend upon This book will be of interest to criminologists sociologists human geographers political scientists and those engaged with development studies as well as civil society organisations and urban researchers
