Choosing and Using a New CAT Rod Mollise, 2009-02-28 Choosing and Using the New CAT will supersede the author's successful Choosing and Using a Schmidt Cassegrain Telescope which has enjoyed enthusiastic support from the amateur astronomy community for the past seven years. Since the first book was published a lot has changed in the technology of amateur astronomy. The sophistication and variety of the telescopes available to amateurs has increased dramatically. Computerized SCTs, Maksutov Cassegrains and most recently Meade's new and acclaimed Ritchey Chr tiens have come to dominate the market. That means that all amateurs considering the purchase of a new telescope not only a SCT and not just beginners will benefit from this detailed guide. Choosing the right telescope for particular kinds of observation or even for general work is far from easy but Rod Mollise gives invaluable advice and guidance. Instruction Manual Meade Instruments Corp, 1999? So You Want a Meade LX Telescope! Lawrence Harris, 2010-07-20 Computers and Astronomy Perhaps every generation of astronomers believes that their telescopes are the best that have ever been. They are surely all correct. The great leap of our time is that computer designed and machined parts have led to more accurately made components that give the astronomer ever better views. The manual skills of the craftsman mirror grinder have been transformed into the new age skills of the programmer and the machine maker. The new products did not end the work of craftsman telescope makers though. Many highly skilled amateur professional opticians continued to produce good quality mirrors that are still seen today. Amateur priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals. This has greatly increased the possibilities of serious astronomy projects for which tailor made software has been developed. Add a CCD camera to these improved telescopes see Chap 3 and you bring a whole new dimension to your astronomy see Fig 1.1 Look Before You Leap. But first a word of caution. Unless you are already familiar with astronomy and basic telescopes it is not wise to start spending large amounts of money on a featured telescope. Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest.

A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad. I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK. I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility. My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55.com website. From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them. Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before. Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the

telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston,2011-09-17 This book offers a comprehensive introductory guide to choosing and using a series LXD55 or LXD75 computer controlled goto telescope containing a wealth of useful information for both beginners and more advanced practical amateur astronomers The manufacturer s manuals are not nearly detailed enough to be of real help to beginners No other book offers advanced techniques for more experienced LXD series users **User's Manual for the NRAO 12 M Millimeter-wave Telescope, Kitt Peak, Arizona** National Radio Astronomy Observatory (U.S.),1990
