Halimah Badioze Zaman,Peter Robinson,Maria Petrou,Patrick Olivier,Heiko Schröder,2009-11-14 Visual informatics is a field of interest not just among the information technology and computer science community but also other related fields such as engineering me cal and health informatics and education starting in the early 1990s Recently the field is gaining more attention from researchers and industry It has become a mul disciplinary and trans disciplinary field related to research areas such as computer vision visualization information visualization real time image processing medical image processing image information retrieval virtual reality augmented reality pressive visual mathematics 3D graphics multimedia fusion visual data mining visual ontology as well as services and visual culture Various efforts has been vested in different research

but operationally many of these systems are not prominent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated. It is for this reason that the Visual Informatics Research Group from Universiti Kebangsaan Malaysia (UKM) decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world namely Asia, Europe, Oceania, and USA. This first International Visual Informatics Conference (IVIC) 2009 was conducted collaboratively by the visual informatics research community from the various public and private institutions of higher learning in Malaysia and hosted by UKM.
