P Werrell,2013-06-11 This is the story of the first jet versus jet war the largest in number of victories and losses and one of the few military bright spots in the Korean War It tells how an outnumbered force of F 86 Sabres limited by range and restricted by the rules of engagement decisively defeated its foe Based on the latest scholarship author Kenneth Werrell uses previously untapped sources and interviews with sixty former F 86 pilots to explore new aspects of the subject and shed light on controversies previously neglected For example he found much greater violation of the Yalu River than thus far has appeared in the published materials The F 86 became a legend in The Forgotten War because of its performance and beauty but most of all because of its record in combat Russian Air Power Yefim Gordon,Alan Dawes,2002 This volume deals with the current state of the Russian Air Arm explaining its structure and order of battle in the light of recent reorganizations Also included are accounts of the first and second Chechen Wars and brief descriptions of all aircraft types currently in use

**Tiger Check** Steven A. Fino,2017-11-01 How did American fighter pilots respond to the challenges posed by increasing automation Spurred by their commanders during the Korean War to be tigers aggressive and tenacious American fighter pilots charged headlong into packs of fireball spewing enemy MiGs relying on their keen eyesight piloting finesse and steady trigger fingers to achieve victory But by the 1980s American fighter pilots vanquished their foes by focusing on a four inch square cockpit display manipulating electromagnetic waves and launching rocket propelled guided missiles from miles away In this new era of automated long range air combat can fighter pilots still be considered tigers Aimed at scholars of technology and airpower aficionados alike Steven A Fino s Tiger Check offers a detailed study of air to air combat focusing on three of the US Air Force s most famed aircraft the F 86E Sabre the F 4C Phantom II and the F 15A Eagle Fino argues that increasing fire control automation altered what fighter pilots actually did during air to air combat Drawing on an array of sources as well as his own decade of experience as an F 15C fighter pilot Fino unpacks not just the technological black box of fighter fire control equipment but also fighter pilots attitudes toward their profession and their evolving aircraft He describes how pilots grappled with the new technologies acutely aware that the very systems that promised to simplify their jobs while increasing their lethality in the air also threatened to rob them of the quintessential albeit mythic fighter pilot experience Finally Fino explains that these new systems often required new unique skills that took time for the pilots to identify and then develop Eschewing the typical great machine or great pilot perspectives that dominate aviation historiography Tiger Check provides a richer perspective on humans and machines working and evolving together in the air The book illuminates the complex interactions between human and machine that accompany advancing automation in the workplace **G-Force: Flying the World's Greatest Aircraft** James Bennet,2016-10 Read what military pilots have to say about flying some of the most incredible fighting aircraft ever built It s like a 20 million strap on carnival ride AH 64 Apache Pilot I had high expectations and it s beat eery one of those The whole jet is awesome F A 18F Super Hornet pilot The role of the pilot has changed hugely in the last sixty years of military aviation Jet pilots in the 1960s flying types such as the Harrier

and F 102 would have spent a huge portion of their concentration just keeping the aircraft under control That left little spare mental capacity to locate and engage the enemy Today the opposite is true Computers have made flying so simple that it is now considered very easy to fly the SAAB Gripen or Lockheed Martin F 35 Lightning II allowing the pilot to focus fully on his or her mission G Force Flying the World s Greatest Aircraft is a celebration of the experience of flying some of aviation s most spectacular powerful and dangerous machines from early jet fighters such as the F 86 Sabre and MiG 15 to today s F 22 Raptor and Eurofighter Typhoon Packed with first hand interviews with test and combat pilots from the world s air forces and illustrated with extensively researched and striking imagery G Force Flying the World s Greatest Aircraft is a thrilling ride alongside the pilots who fly the aircraft every day Featuring first hand accounts of combat over Korea in the MiG 15 endurance missions in the B 2 and bombing Iraqi targets in the Tornado this book puts the reader directly in the pilot s seat and will appeal to aviation enthusiasts of all ages *F-86A Sabre* Peter E.
