Disruptive Technologies for the Militaries and Security Ajey Lele,2018-12-28 This book debates and discusses the present and future of Disruptive Technologies in general and military Disruptive Technologies in particular Its primary goal

is to discuss various critical and advanced elucidations on strategic technologies The focus is less on extrapolating the future of technology in a strict sense and more on understanding the Disruptive Technology paradigm It is widely accepted that technology alone cannot win any military campaign or war However technological superiority always offers militaries an advantage More importantly technology also has a great deterrent value Hence on occasion technology can help to avoid wars Accordingly it is important to effectively manage new technologies by identifying their strategic utility and role in existing military architectures and the possible contributions they could make towards improving overall military capabilities This can also entail doctrinal changes so as to translate these new technologies into concrete advantages

Social Media and the Armed Forces Eva Moehlecke de Baseggio,Olivia Schneider,Tibor Szvircsev Tresch,2020-09-07 Social media has fundamentally changed communication and interaction in today s society Apart from being used by individuals it is also omnipresent in public sector organisations such as the armed forces This book examines the opportunities and risks associated with social media in the context of the armed forces from an international social scientific perspective It discusses the impact of social media in the everyday life of military personnel and analyses the extent to which social media influences their performance be it as a distraction or as a source of perceived appreciation It particularly highlights the representation of masculinity and femininity in military social media channels since the way gender is portrayed on social media has an effect on how future recruits and at the other end of the military career spectrum veterans feel they are approached The book also focuses on the new form of follow up discussion which enables the armed forces to interact with the population On social media the armed forces are publicly presented and this shapes the public s opinions on them Further the armed forces can use debates as a monitoring tool of society s attitudes towards them or towards events that have an effect on society

Conversely social media can lend a voice to military personnel allowing them to be publicly heard As discussions on social media can only be controlled to a limited extent the context in which the armed forces are discussed alters their sphere of influence and potentially leads to a loss of control An extreme example of this is the use of social media as a tool to strategically distribute misinformation in order to shape public opinion and threaten national security Moreover the use of social media to demoralise adversaries or to harm their credibility results in social media being considered a cyber weapon that affects politics and military activities **Professional Journal of the United States Army**,2017 **Political Handbook of the World 2016-2017** Tom Lansford,2017-03-31 Published since 1928 the Political Handbook of the World provides timely thorough and accurate political information with more in depth coverage of current political controversies and political parties than any other reference guide The updated 2016 2017 Edition continues this legacy as the most authoritative source for finding complete facts and analysis on each country s governmental and political makeup Political science and international relations scholars have revised this edition and made understanding complex foreign affairs and political situations easy and accessible With more than 200 entries on countries and territories throughout the world housed in one place these volumes are renowned for their extensive coverage of all major and minor political parties and groups in each political system They also provide names of key ambassadors and international memberships of each country plus detailed profiles of more than 30 intergovernmental organizations and United Nations agencies This comprehensive update will include coverage of current events issues crises and controversies from the course of the last two years including The closely watched U S presidential election The effect of the Brexit referendum and installment of a new British prime minister The extensive investigation and subsequent impeachment of Brazil s president The far reaching impact of the Panama Papers scandal Changes in U S Cuba diplomatic relations and the reopening of their embassies The unconstitutional declaration of Gambia as an Islamic State Sentiments about the migrant and refugee crisis across Europe and the influence on policy Also the new For Further Reference feature included for every country entry directs readers to additional resources to continue their research [Militarizing Artificial Intelligence](#) Nik Hynek,Anzhelika Solovyeva,2022-07-01 This book examines the military characteristics and potential of Artificial Intelligence AI in the new global revolution in military affairs Offering an original perspective on the utilization imagination and politics of AI in the context of military development and weapons regulation the work provides a comprehensive response to the question of how we might reflect on the AI revolution in warfare and what can be said about the ways in which this has been handled In the first part of the book AI is accommodated both theoretically and empirically in the strategic context of the Revolution in Military Affairs RMA The book offers a novel understanding of autonomous weapons as multi layered composite systems pointing to a complex non linear interplay between evolutionary and revolutionary dynamics In the second section the book provides an impartial analysis of the related politics and operations of power whereby increases in military budgets and R D of the great powers are met and

countered by advocacy networks and scientists campaigning for a ban on lethal autonomous weapons As such it moves beyond popular caricatures of killer robots and points out some of the problems which result from over reliance on such imagery This book will be of much interest to students of strategic studies critical security studies arms control and disarmament science and technology studies and general International Relations *Necessity and Proportionality in International Peace and Security Law* Claus Kreß, Robert Lawless, 2021 There are legal limits on the circumstances under which states may use military force to address a perceived or actual threat The concepts of necessity and proportionality are central to these limitations imposed by the law Necessity and Proportionality in International Peace and Security Law explores the many ways in which necessity and proportionality arise in the law on the modern battlefield which is rapidly changing complex and ambiguous *Congressional Record* United States. Congress, 2017 *Technology and National Security* James Kadtke, John Wharton, National Defense University (U S), 2018-03-29 The authors present arguments about the role that technology and science will play within the international scene and globalization corridor as a way to develop a national security strategy for years to come Part of the discussion observes the past present and future of technology innovation within global governments including the sharing of data artificial intelligence AI military policy defense strategies and more For instance globalization of science and technology emerging and unpredictable threats both manmade and natural conventional and emerging weapons of mass destruction and an inversion of technology flow from the private to public sectors all present challenges to our national security Many countries are now dramatically increasing their investments in science technology and commercialization particularly in Asia and including many nontraditional players such as Vietnam and Singapore From a grand strategic perspective one might observe that in the decades to come in a world dominated by pervasive advanced technologies the countries that are most able to create acquire and utilize these disruptive technologies will lead the world This technological capacity will be one of if not the most important global resources Technological capacity will become the new oil Other topical related products can be found here Armed Robotics Emergence Weapons Systems Life Cycles Analysis and New Strategic Realities Enhancing Identity Development at Senior Services Colleges Military Communications A Test for Technology Closer Than You Think The Implications of the Third Offset Strategy for the U S Army **ECCWS 2017 16th European Conference on Cyber Warfare and Security** Academic Conferences and Publishing Limited, 2017
