John Martino,2021-05-03 As the twenty first century unfolds society is confronted with the normalization of warfare and political violence and their growing allure for the young Current global political events highlight the extent to which young people have become the target of both State and non State actors in the prosecution of war and terror The conduct of what we can refer to as social war has increasingly come to target the young through media social media the internet and video games and more directly through acts of violence the massacre of children the reliance on child soldiers and the use of children in martyrdom operations as legitimate forms of conduct The appropriation of the young as political and military materials through the processes of both radicalization and militarization warrants close examination Drumbeat examines these issues within the context of the ongoing process of militarization and the establishment of a state of perpetual warfare The book distinguishes between radicalization which refers to the application of propaganda and ideological methods by non State agents and militarization which refers to the application of propaganda and ideological methods by State agents in order to effectively prosecute war The focus of this book will be an examination of the mechanisms through which forms of media and other digital and web based artefacts social media video and video games assist in the militarization and radicalization of the young There is a growing body of evidence which points to the effectiveness of various forms of media in both the recruitment of young people and the promotion of ideological frames For example non State actors extremist religious groups and the Alt Right have been highly effective in appropriating new media to project their propaganda messages and their appeal to young people The book also argues that militarization has become a powerful societal force which is re configuring the daily conduct of life in the West Just as radicalization seeks to prepare the young for the conduct of war militarization also functions to position the broader society for war This is a new form of the civilizing process to which Norbert Elias referred In this context new media provides the conduits through which this process is legitimized celebrated and promulgated *Notes and Queries* ,1917 *The Timpani* G. Essays on Benjamin Britten from a Centenary Symposium Quinn Patrick Ankrum, David Forrest, Stacey Jocoy, 2017-06-20 Coming to terms with Britten's music is no easy task. The complex, often contradictory language associated with Britten's style likely stems from his double interest in progressive composition and immediate connection with a broad popular audience, an apparent paradox in the splintered musical culture of the 20th century as well as from complicated truths in his own life, such as his love for a country that accepted neither his sexuality nor his politics. As a result, the attempt to describe his music can tell us as much about our own biases and the inadequacies of our analytic tools as it does about the music itself. Such audits of our scholarly language and strategies are vital in light of the still murky view we have of twentieth-century music. This opportunity for academic self-reflection is the reason Britten studies such as this book are so important. The essays included here challenge assumptions about musical constructs, relationships between text and music, and the influences of age, spirituality, and personal relationships on compositional technique. Part One offers nine essays originally compiled for a symposium designed to recognize the composer's unique and varied contributions to music. The authors include performers, musicologists, and music theorists, and their work will appeal to a wide diversity of readers. The topics and methodologies range from archival research and analysis of text and music to theoretical modelling using techniques such as set theory, metric theory, and prolongation. While the papers were initially conceived in isolation from one another, the collaborative focus of the symposium created opportunities for authors to expose points of intersection. This deliberate reconciliation of lines of inquiry has yielded a more balanced and unified collection of essays than typically found in a simple record of proceedings. Furthermore, the chapters presented here benefit from the wealth of Britten research produced since the 2013 centenary. Part Two provides an account of the symposium performances and lecture recitals that accompanied and enriched the academic presentations. The reader will encounter fully the journey taken by symposium presenters, participants, and attendees by reviewing the concerts, lecture recitals, and papers in the context of the full symposium program.

Military Leadership and Counterinsurgency Victoria Nolan, 2011-12-18 Offering a unique and original perspective on Britain's Small Wars leadership culture, this title is an essential reading for serving soldiers and scholars of military studies. It is based on original archival research. It offers a fascinating survey of counterinsurgency operations with relevance for today's military and security. Between 1948 and 1960, the British army conducted three important counterinsurgency operations in Malaya, Kenya, and Cyprus. During that time, military leaders inspired the evolution of a distinct organisational culture known as small wars culture, which affected learning, discipline, and attitudes towards leadership and fellow soldiers. Using a synthesis of organisational theory and archival research, this book explores how military leaders embedded and transmitted this particular military organisational culture within the British army and provides an analysis of leaders' characteristics, their support networks, and past experiences. This book will be of interest to counterinsurgency specialists, the
