How does Information Technology enable competitive advantage? Digital Disciplines details four strategies that exploit today's digital technologies to create unparalleled customer value. Using non-technical language, this book describes the blueprints that any company, large or small, can use to gain or retain market leadership based on insights derived from examining modern digital giants such as Amazon, Netflix and Uber, established firms such as Burberry, GE, Nike and Procter & Gamble, and lesser known innovators such as Alvie Fruition Sciences, Opower and Quirky. Companies can develop a competitive edge through four digital disciplines: information excellence, solution leadership, collective intimacy and accelerated innovation that exploit cloud computing, big data and analytics, mobile and wireline networks, social media and the Internet of Things. These four disciplines extend and update the value disciplines of operational excellence, product leadership and customer intimacy originally defined by Michael Treacy and Fred Wiersema in their bestselling business classic *The Discipline of Market Leaders*. Operational excellence must now be complemented by information excellence, leveraging automation, information analytics and sophisticated algorithms to make processes faster, better and more cost effective, seamlessly fuse digital and physical worlds and generate new revenue through techniques such as exhaust data monetization. Product leadership must be extended to solution leadership, smart digital products and services ranging from wind turbines and wearables to connected healthcare linked to each other, cloud services, social networks and partner ecosystems focused on customer outcomes and creating experiences and transformations. Customer intimacy is evolving to collective intimacy as face-to-face relationships not only go online but are collectively analyzed to provide individually targeted recommendations and personalized services ranging from books and movies to patient specific therapies. Traditional innovation is no longer enough, accelerated
