Learning

That Sticks Bryan Goodwin, Tonia Gibson, Kristin Rouleau, 2020-06-05 In far too many classrooms the emphasis is on instructional strategies that teachers employ rather than on what students should be doing or thinking about as part of their learning. What's more, students' minds are something of a mysterious black box for most teachers, so when learning breaks down, they're not sure what went wrong or what to do differently to help students learn. It doesn't have to be this way. Learning That Sticks helps you look inside that black box. Bryan Goodwin and his coauthors unpack the cognitive science underlying research-supported learning strategies so you can sequence them into experiences that challenge, inspire, and engage your students. As a result, you'll learn to teach with more intentionality, understanding not just what to do but also when and why to do it. By way of an easy-to-use six-phase model of learning, this book analyzes how the brain reacts to, stores, and retrieves new information. Helps you zoom out to understand the process of learning from beginning to end. Helps you zoom in to see what's going on in students' minds during each phase. Learning may be complicated, but learning about learning doesn't have to be. And to that end, Learning That Sticks helps shine a light into all the black boxes in your classroom and make your practice the most powerful it can be. This product is a copublication of ASCD and McREL. *Engineering Instruction for High-Ability Learners in K-8 Classrooms* National Assoc For Gifted Children, Alicia Cotabish, 2021-09-03 *Engineering Instruction for High-Ability Learners in K-8 Classrooms* is an application-based practitioners guide to applied engineering that is grounded in engineering practices found in the new Next Generation Science Standards (NGSS) and the Standards for Engineering Education. Giving Space to African Voices Zehlia Babaci-Wilhite, 2014-08-07 This book sets out to bring voices of the South to the debate on localization of education and makes the case that it should be considered a right in education Despite all the scientifically based evidence on the improved quality of education through the use of a local language and local knowledge English as a language of instruction and Western knowledge based curriculum continue to be used at all educational levels in many developing nations This means that in many African countries the goal of rights to education is becoming increasingly remote let alone that of rights in education With this understanding and with the awareness of the education challenges of millions of children throughout Africa the authors argue that local curriculum through local languages needs to be valued and to be preserved and that children need to be prepared for the world in a language that promotes understanding The authors make a clear case that policy makers are in a position to work towards a quality education for all as part of a more comprehensive right based approach We owe it to the children of the South to offer the best quality education possible in order to achieve social justice
