Grade 1march2013 Exam Paper For Business Studies On Caps:

From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee, 2013 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast. Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system. GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair. MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government's plans. The report also questions how well the Government's proposals will serve lower attaining pupils who are often the most disadvantaged. There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs. The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils. MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards. The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system. MPs also note the wide ranging stakeholder opposition to many of the Government's proposals.

What's Your Digital Business Model? Peter Weill, Stephanie Woerner, 2018-04-17 Digital transformation is not about technology; it's about change. In the rapidly changing digital economy, you can't succeed by merely tweaking management practices that led to past success. And yet, while many leaders and managers recognize the threat from digital and the potential opportunity, they lack a common language and compelling framework to help them assess it and guide them in responding. They don't know how to think about their digital business model. In this concise practical book, MIT digital research leaders Peter Weill and Stephanie Woerner provide a powerful yet straightforward framework that has been field tested globally with dozens of senior management teams. Based on years of study at the MIT

Center for Information Systems Research CISR the authors find that digitization is moving companies business models on two dimensions from value chains to digital ecosystems and from a fuzzy understanding of the needs of end customers to a sharper one Looking at these dimensions in combination results in four distinct business models each with different capabilities The book then sets out six driving questions in separate chapters that help managers and executives clarify where they are currently in an increasingly digital business landscape and highlight what s needed to move toward a higher value digital business model Filled with straightforward self assessments motivating examples and sharp financial analyses of where profits are made this smart book will help you tackle the threats leverage the opportunities and create winning digital strategies
