Collecting for the Curriculum Amy J. Catalano, 2015-09-28 If you are a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards then this book is the only one that offers explicit advice on collection development in curriculum collections. While there are many publications on the Common Core for school librarians and K-12 educators, no such literature exists for curriculum librarians at the postsecondary level. This book fills that gap, standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research-based practices in curriculum development and instruction to guide you in curriculum selection. Material types covered include games, textbooks, children's literature, primary sources, counseling, and nonfiction. Additional chapters cover the management of curriculum collections, testing collections, and instruction and reference, as well as how to support and collect for special needs learners. Current practices in collection development for curriculum materials librarians are also reviewed. The book closes with a discussion of the future of curriculum materials.

The Wiley Handbook of Adult Literacy Dolores Perin, 2019-08-09 Examines the widespread phenomenon of poor literacy skills in adults across the globe. This handbook presents a wide range of research on adults who have low literacy skills. It looks at the cognitive, affective, and motivational factors underlying adult literacy, adult literacy in different countries, and the educational approaches being taken to help improve adults' literacy skills. It includes not only adults enrolled in adult literacy programs but postsecondary students with low literacy skills, some of whom have reading disabilities. The first section of *The Wiley Handbook of Adult Literacy* covers issues such as phonological abilities in adults who have not yet learned to read, gender differences in the reading motivation of adults with low literacy skills, literacy skills, academic self-efficacy, and participation in prison education, and more. Chapters on adult literacy, social change, and sociocultural factors in South Asia and in Ghana, literacy, numeracy, and self-rated health among U.S. adults, adult literacy programs in Southeastern Europe and Turkey, and a review of family and workplace literacy programs are among the topics featured in the second section. The last part examines how to teach reading and writing to adults with low skills, adults' transition from secondary to postsecondary education, implications for policy, research, and practice in the adult education field, educational technologies that support reading comprehension, and more. Looks at the cognitive processing challenges associated with low literacy in adults. Features contributions from a global team of experts in the field. Offers writing strategy instruction for low-skilled postsecondary students. *The Wiley Handbook of Adult Literacy* is an excellent book for academic researchers, teacher educators, professional developers, program designers, and graduate students. It is also beneficial to curriculum developers.
