Antiphospholipid Syndrome Doruk Erkan, Michael D. Lockshin, 2017-06-09 This new edition is a comprehensive and updated resource on antiphospholipid syndrome (APS), which is an autoimmune disorder. In APS, the body recognizes certain normal components of blood and/or cell membranes as foreign substances and produces antibodies (antiphospholipid antibodies) against them. APS is associated with recurrent clotting events (thrombosis) including premature stroke, repeated miscarriages, phlebitis, venous thrombosis, and pulmonary thromboembolism. It is also associated with low platelet or blood elements that prevent bleeding. Recently, however, even more disease states have been linked with APS, including premature heart attack, various cardiac valvular abnormalities, skin lesions, kidney disease, abnormal involuntary movement (chorea), diseases that mimic multiple sclerosis, and vascular diseases of the eye that can lead to visual loss and blindness. The International Congress on Antiphospholipid Antibodies, held every 3 years, is the venue where representatives from different disciplines gather to discuss the recent advances in APS. The conference intends to cover basic aspects of APS, such as pathogenesis, origins, genetics, intracellular and molecular events, the role of infections, as well as traditional and non-traditional clinical manifestations associated with antiphospholipid antibodies. The 15th Congress took place in September 2016. A novel aspect of the Congress was that multiple teams, chaired by Scientific Planning Committee members, used evidence-based literature reviews and expert discussions to answer specific pre-defined APS-related questions. These teams included points of view from experts in rheumatology, hematology, cardiovascular medicine, obstetrics, neurology, and immunology. The Scientific Planning Committee members also chaired the congress sessions and supervised completion of the reports that are the bases of the chapters of this book. In addition, there are two chapters included specifically written for APS patients. Much like the previous volume dedicated to the 13th International Congress on Antiphospholipid Antibodies (April 2010), this up-to-date and comprehensive work gathers invaluable insights from a multidisciplinary team of world-renowned experts and represents the authoritative resource on causes, symptoms, diagnosis, and treatment of APS.
