Information Architecture Louis Rosenfeld, Peter Morville, Jorge Arango, 2015-09-09 Annotation The fourth edition of this guide focuses on

information architecture as a set of tools and techniques for dealing with today's tough information organization problems. It's ideal for anyone involved in any aspect of design. The universal and timeless principles of information organization described in the book's first three editions still apply in our increasingly mobile world. In the fourth edition, the authors cast those principles in the context of current practice using many updated examples and illustrations.

Statistical and Machine-Learning Data Mining: Bruce Ratner, 2017-07-12. Interest in predictive analytics of big data has grown exponentially in the four years since the publication of *Statistical and Machine Learning Data Mining Techniques for Better Predictive Modeling and Analysis of Big Data*. Second Edition. In the third edition of this bestseller, the author has completely revised, reorganized, and repositioned the original chapters and produced 13 new chapters of creative and useful machine learning data mining techniques. In sum, the 43 chapters of simple yet insightful quantitative techniques make this book unique in the field of data mining literature. What is new in the Third Edition? The current chapters have been completely rewritten. The core content has been extended with strategies and methods for problems drawn from the top predictive analytics conference and statistical modeling workshops. Adds thirteen new chapters including coverage of data science and its rise, market share estimation, share of wallet modeling without survey data, latent market segmentation, statistical regression modeling that deals with incomplete data, decile analysis, assessment in terms of the predictive power of the data, and a user-friendly version of text mining not requiring an advanced background in natural language processing. NLP. Includes SAS subroutines which can be easily converted to other languages. As in the previous edition, this book offers detailed background discussion and illustration of specific methods for solving the most commonly experienced problems in predictive modeling and analysis of big data. The author addresses each methodology and assigns its application to a specific type of problem. To better ground readers, the book provides an in-depth discussion of the basic methodologies of predictive modeling and analysis. While this type of overview has been attempted before, this approach offers a truly nitty-gritty step-by-step method that both tyros and experts in the field can enjoy playing with.

The Psychodynamics of Enlightened Leadership Ian I. Mitroff, Ralph H. Kilmann, 2021-06-10. This open access book provides a comprehensive look at the pluses and minuses of leadership in times of an unparalleled crisis such as the COVID-19 global pandemic. It examines the COVID-19 crisis in terms of psychodynamics, crisis management, and especially from the standpoint of complex, messy systems. It analyses how leaders need to think and act differently to cope better with and potentially prevent future crises.

Amphibian Carla Gunn, 2005-04-14. Nine-year-old Phineas William Walsh has an encyclopedic knowledge of the natural world. He knows that rockfish have swim bladders that can burst and push their intestines out their butts, and he knows that barnacles have the longest penises in the animal kingdom. He's obsessed with animals; it's practically all he talks about, and he spends all his spare time watching the Green Channel or researching obscure facts on the internet or in books. And he's worried sick about what humans are doing to the planet and its other animals. But although he seems to know absolutely

everything about the animal world what he doesn't know is why his granddad had to die or why Lyle the bully always picks on him or why his parents can't live together He misses his grandad terribly and he hates to see his grandmother the only person who understands his eco worrying so sad He misses his dad too and wishes he could see him more and that the separation didn't make his mom so lonely though he sure doesn't like her talking to creepy Brent And things only get worse when Phin's mom desperately worried about his animal obsession takes him to see a rather unsympathetic psychologist When his Grade 4 class gets a pet frog a White's Tree Frog from Australia it becomes the perfect focus for all Phin's worrying He can't bear to see Cuddles penned up in a cage so very far from his natural habitat just for the amusement of humans It's just another example of how cruel and self-centred humans are And so Phin and his best pal Bird are spurred to action
