Noise Control Act of 1971 and Amendments United States. Congress. Senate. Committee on Commerce. Subcommittee on the Environment, 1972 *Noise and Environment* Daniela Siano, Alice Elizabeth Gonzalez, 2021-02-03 Noise pollution is one of the factors that affect the quality of life of the general population especially in urban areas where the noise levels are often high due to the presence of numerous sources such as transport infrastructures activities production and commercial areas entertainment venues and other sound sources which although temporary such as construction sites and outdoor music events affect general noise levels Even if noise is one of the oldest pollutants referred to in history for years the problem of noise pollution has been often considered less important than others related to the environment such as air pollution water pollution and waste management The regulations in force to contain the noise have become increasingly stringent as each individual is constantly exposed to noise and often the noise is treated just as a scourge of modern society Making noise is becoming easier and cheaper each day but just the opposite for controlling it Deeper studies are needed to understand the core of current noise problems new materials and techniques are needed to control them This book is a combination of theory and practice based on the latest research The studies in this book range from evaluation methods for the perception of noise and outline forecast criteria that can be integrated with applications for acoustic mapping as well as the use of

innovative techniques and materials for its abatement The main purpose of this book organized in 8 chapters is to provide an overview of the recent studies in this field and the applications in different research studies The authors contributing to the success of this book provide a series of practical applications of their recent studies aimed at the reduction of noise in different environments The editors would like to thank all the authors who through their studies and research have accepted our invitation to share recent discoveries in this field with the scientific community

Putting Crime in its Place David Weisburd,Wim Bernasco,Gerben Bruinsma,2008-10-20

Putting Crime in its Place Units of Analysis in Geographic Criminology focuses on the units of analysis used in geographic criminology While crime and place studies have been a part of criminology from the early 19th century growing interest in crime places over the last two decades demands critical reflection on the units of analysis that should form the focus of geographic analysis of crime Should the focus be on very small units such as street addresses or street segments or on larger aggregates such as census tracts or communities Academic researchers as well as practical crime analysts are confronted routinely with the dilemma of deciding what the unit of analysis should be when reporting on trends in crime when identifying crime hot spots or when mapping crime in cities In place based crime prevention the choice of the level of aggregation plays a particularly critical role This peer reviewed collection of essays aims to contribute to crime and place studies by making explicit the problems involved in choosing units of analysis in geographic criminology Written by renowned experts in the field the chapters in this book address basic academic questions and also provide real life examples and applications of how they are resolved in cutting edge research Crime analysts in police and law enforcement agencies as well as academic researchers studying the spatial distributions of crime and victimization will learn from the discussions and tools presented

operatives attempt to piece together unrelated and illegible fragments from around the world several plots gradually mesh into a dramatic chain of events led by an evil man who masterminds the complex operation from behind his desk Peril faces New York City and the world at large as only one question remains left unanswered who will be faster on the trigger

Courting Gender Justice Lisa McIntosh Sundstrom,Valerie Sperling,Melike Sayoglu,2019-02-01 Women and the LGBT community in Russia and Turkey face pervasive discrimination Only a small percentage dare to challenge their mistreatment in court Facing domestic police and judges who often refuse to recognize discrimination a small minority of activists have exhausted their domestic appeals and then turned to their last hope the European Court of Human Rights ECtHR The ECtHR located in Strasbourg France is widely regarded as the most effective international human rights court in existence Russian citizens whose rights have been violated at home have brought tens of thousands of cases to the ECtHR over the past two decades But only one of these cases resulted in a finding of gender discrimination by the ECtHR and that case was brought by a man By comparison the Court has found gender discrimination more frequently in decisions on Turkish cases *Courting Gender Justice* explores the obstacles that confront citizens activists and lawyers who try to bring gender discrimination cases to court To shed light on the factors that make rare victories possible in discrimination cases the book draws comparisons among forms of discrimination faced by women and LGBT people in Russia and Turkey Based on interviews with human rights and feminist activists and lawyers in Russia and Turkey this engaging book grounds the law in the personal experiences of individual people fighting to defend their rights **Hearings** United States.
