Subscribers' perceptions about customers' past service failures, how those service failures might be addressed by management, and the company's responsiveness to customer demands, all have a significant effect on subscribers' purchase intentions. In addition, the degree of this perception of the firm's past service failures is moderated by subscribers' trust in the company's management. Thus, subscribers' purchase intentions are more strongly influenced by the company's responsiveness to service failures when they have a high level of trust in the company's management.
