Ju 87D/G STUKA versus T-34 Robert Forsyth, 2023-09-28 An examination of two of the most high profile air and land weapons to be deployed on the Eastern Front in World War II In late 1942 as part of its attempts to strike back at ever increasing numbers of Soviet tanks the German air ministry authorised the development of an adaptation and enhancement of the longspan Junkers Ju 87D 5 Stuka dive bomber The aircraft was duly fitted with two underwing pods containing 37 mm BK cannon an anti-aircraft cannon with its origins dating back to 1933 The solid slow Ju 87 airframe offered the Luftwaffe an ideal platform for specialist low level tank killing operations Despite the wealth of experience possessed by some of the Luftwaffe's ground attack and dive bomber aces knocking out T 34 tanks from the air was a demanding and difficult process Nevertheless some Luftwaffe pilots notched up impressive tank scores and the Ju 87 is credited with the destruction of more than 100 tanks across the central and southern sectors of the Eastern Front including during the Battle of Kursk Including personal accounts from Stuka pilots and biographies of the anti tank aces together with detailed photographs of the cannon installation into the Ju 87G and details of the construction of the T 34 illustrated using specially commissioned artwork this book covers the epic clash of two legendary machines of World War II

Combat in the Stratosphere Steven Taylor, 2024-05-31 The first book devoted exclusively to exploring the development and use of aircraft designed specifically for high altitude operations in World War II In the summer of 1940 a new German aircraft began appearing in the skies over the British Isles Unlike the rest of the Luftwaffe's fleet in the Battle of Britain these aircraft were flying at a height of 40 000 feet and higher way beyond the reach of the RAF's defending fighters These virtually untouchable intruders were examples of the Junkers Ju 86P The world's first operational combat aeroplane equipped with a pressurized cabin they were able to reach a maximum altitude of 42 000 feet The Ju 86P's introduction ushered in a new era of aerial warfare where combat would take place at previously unimaginable heights The Ju 86P was just one of many high altitude aircraft projects developed by both the Axis and Allied powers during the Second World War Others included the Vickers Wellington Mk VI Vickers Windsor Boeing B 29 Superfortress Junkers Ju 388 Heinkel He 274 and Henschel Hs 130 With pressurized cabins such aircraft offered obvious tactical advantages bombers and reconnaissance aircraft could operate safely above the maximum ceiling of the opposing side's fighters prompting intense development especially by the British and Germans of pressurized interceptors to meet the threat they posed *Combat in the Stratosphere* is the first book devoted exclusively to exploring the fascinating story of the development and operational history of aircraft designed specifically for high altitude operations during the Second World War But this is not a book solely about the machines themselves It also focuses on the men who flew these revolutionary

aircraft both in the testing phase and in combat and the physical challenges these courageous airmen faced as they pushed themselves to the very edge of physical endurance in this desperate race to reach ever higher altitudes Drawing on a wide range of sources including air combat reports British Cabinet files and Air Ministry documents as well as first hand accounts of aeronautical engineers and the pilots who flew these aircraft *Combat in the Stratosphere* reveals the full story of this largely overlooked aspect of Second World War air warfare high above the skies of Europe North Africa the Soviet Union and Japan Applied Digital Control J. R. Leigh,2006-06-23 An essential core text this volume develops theoretical foundations and explains how control systems work in real industrial situations Several case histories assist students in visualizing applications 1992 edition *Kites, Birds & Stuff - Aircraft of GERMANY - MESSERSCHMITT Aircraft* P.D. Stemp,2014-12-14 A detailed history of Messerschmitt aircraft From their very early years through the war years and beyond Specifications on performance dimensions weights engines armaments prototypes first flights plus other relevant details The book contains around 216 pictures along with around 63 plan diagrams also with around 679 individual aircraft details
