Fathers and Forefathers Martin Robb, 2020-12-15 Research on fathers and fatherhood has blossomed in recent years focusing for the most part on present day fathering experiences but also beginning to uncover hidden narratives of past fatherhood This collection aims to add something new to this expanding field by exploring the dynamic relationship between present and past fatherhoods The popular understanding of fathers in past generations as being detached and uninvolved in the lives of their children can be said to play a significant part in the construction of modern fathering identities with ideas of new fatherhood being played off against notions of historical fathering practices However research has begun to show that these popular myths often misremember the past judging it by current standards and obscuring the diverse nature of fathering practices in

the recent and distant past A genealogical approach is able to critically examine these intergenerational constructions of fatherhood and more positively illuminate the ways in which experiences of fathering and being fathered are passed on between generations The contributions to this collection use a genealogical approach broadly defined to fathering and fatherhood as a way of defamiliarizing accepted narratives and suggesting new ways of thinking about men and their relationships with their children

The Sacred Is the Profane William Arnal, Russell T. McCutcheon, 2013 The Sacred Is the Profane collects nine essays written over several years by William Arnal and Russell T McCutcheon that share a convergent perspective not simply that both the category and concept religion is a construct something that we cannot assume to be natural or universal but also that the ability to think and act religiously is quite specifically a modern political category in its origins and effects the mere by product of the modern state These collected essays substantially rewritten for this volume advance current scholarly debates on secularism debates which the authors argue insufficiently theorize the sacred secular church state and private public binaries by presupposing religion often under the guise of such terms as religiosity faith or spirituality to historically precede the nation state The essays return again and again to the question of what religion word and concept accomplishes now for those who employ it whether at the popular political or scholarly level The focus here for two writers from seemingly different fields is on the efficacy costs and the tactical work carried out by dividing the world between religious and political church and state sacred and profane

Spirits in Politics Barbara Meier, Arne S. Steinforth, 2013-09 4e de couv This anthropology addresses persisting questions social anthropologist historians and political scientists working in African societies have been confronted with Do spirits enter the scene after political have failed as a relapse into an allegedly non modern condition Or do they precede colonial processes of political transformation as classis theories of modernization

Scott, 2018-01-23 While there has been a flood of scholarly efforts to extend adapt and revise Foucault's exploration of the emergence and operations of neoliberalism the study of foreign policy has remained steeped in the analysis of partisanship institutions policies and personality and their influence on various issue areas toward particular countries or specific presidential doctrines This book brings the political rationality of neoliberalism to bear on U S foreign policy in two distinct ways First it challenges complicates and revises the numerous interpretations of U S nationalism that posit a homologous relationship between 1898 and contemporary nationalism instead arguing that alterations in the operations of capitalism and its correlative forms of governance have produced a differently formatted nationalism which in turn has produced different operations of U S hegemony in the twenty first century that markedly depart from earlier eras Second this book argues for a new timeline one that starts with the Carter Reagan era and the crisis of capitalism ultimately encouraging us to think beyond particular presidencies wars bureaucratic politics and policies in order to train our sights on how long term and sustained shifts in the economy and attendant government practices have emerged to produce new myths of exceptionalism that more fully cohere with the neoliberal foundations of the U S nation state **Law for Business**

Development and Practices Ismail Hussein Amzat, Nena P. Valdez, 2017-04-22 This book gathers a range of contributions

from researchers and practitioners across borders with an emphasis on theoretical arguments and empirical data concerning teacher empowerment. It propels readers to explore powerful teaching practices that can further advance the profession as a continuing priority in the system when appropriately utilized. Further, it strives to capture teachers' readiness to improve their professional skills and responsive practices as a form of accountability for their teaching and students' learning. Two aspects that are increasingly being judged by various stakeholders are teachers' autonomous participation and engagement in relevant decision-making activities and equitable access to continuing professional development opportunities. These are and should remain major priorities.

Fueling Culture Jennifer Wenzel, Patricia Yaeger, 2017-02-01 How has our relation to energy changed over time? What differences do particular energy sources make to human values, politics, and imagination? How have transitions from one energy source to another, from wood to coal or from oil to solar to whatever comes next, transformed culture and society? What are the implications of uneven access to energy in the past, present, and future? Which concepts and theories clarify our relation to energy, and which just get in the way? *Fueling Culture* offers a compendium of keywords written by scholars and practitioners from around the world and across the humanities and social sciences. These keywords offer new ways of thinking about energy as both the source and the limit of how we inhabit culture, with the aim of opening up new ways of understanding the seemingly irresolvable contradictions of dependence upon unsustainable energy forms. *Fueling Culture* brings together writing that is risk-taking and interdisciplinary, drawing on insights from literary and cultural studies, environmental history, and ecocriticism, political economy, and political ecology, postcolonial and globalization studies, and materialisms old and new. Keywords in this volume include: Aboriginal, Accumulation, Addiction, Affect, America, Animal, Anthropocene, Architecture, Arctic, Automobile, Boom, Canada, Catastrophe, Change, Charcoal, China, Coal, Community, Corporation, Crisis, Dams, Demand, Detritus, Disaster, Ecology, Electricity, Embodiment, Ethics, Evolution, Exhaust, Fallout, Fiction, Fracking, Future, Gender, Green, Grids, Guilt, Identity, Image, Infrastructure, Innervation, Kerosene, Lebenskraft, Limits, Media, Metabolism, Middle East, Nature, Necessity, Networks, Nigeria, Nuclear, Petroviolence, Photography, Pipelines, Plastics, Renewable, Resilience, Risk, Roads, Rubber, Rural, Russia, Servers, Shame, Solar, Spill, Spiritual, Statistics, Surveillance, Sustainability, Tallow, Texas, Textiles, Utopia, Venezuela, Whaling, Wood, Work. Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.
