previously been accepted in the field This book sets out to explore a diverse array of alternative modes and multiple ways of storytelling organizations The editors intentionally sought to involve an international network of authors with diverse storytelling accounts of history as a way of helping build out this new storytelling paradigm in a diverse and inclusive ethic As a result this volume showcases a broad spectrum of critical storytelling from geographically diverse authors working in universities small businesses and public service throughout Brazil Canada Finland the United Kingdom and the United States To reflect these dynamics and for the stories in this volume to fit together chapters were organized into three themes stories of processing history tales of history as method and narratives of history through a business opportunity Volume 3 features stories that reflect the exacerbated inequalities of race gender and income across the world These inequalities and power relations remain continuously contested particularly in these trying times despite being captive to a particular economic ideology built on the premise of exploitation and subjugation The stories told in this volume tell against the orthodoxy the colonizer and the seemingly powerful They are organized as stories of resistance emancipation and transformation They invite us to rethink the multiple ways to restructure power relations between the colonizer and the colonized and open up spaces for the marginalized underprivileged voices Volume 4 is designed to create a new business storytelling paradigm that critically approaches business narratives that have historically privileged a corporate agenda It explores the various ways that images of the other in business are developed presented and accounted for through powerful and dominant narratives The stories in this volume collectively help readers to understand resist and provide strategies for change through various analyses of how business narratives come to develop get written are legitimized are challenged and get changed over time Volume 5 brings together the practices specific to the socioeconomic approach to management SEAM SEAM is a method of change management developed through research interventions carried out in more than 2 000 companies and organizations since 1975 This method is systemic it considers the whole company and tends to simultaneously increase social and economic performance by focusing mainly on the development of human skills and behaviors making it possible to reduce dysfunctions and recycle hidden costs into added value
