Each shipment shall contain one terminal boot per phase for each circuit. Boots vary in size based on the number of lugs/cables per terminal adapter. The illustrations herein represent only one size, but all items are installed in like manner.

Installation of insulated terminal boots

Step 1

As shown in **Figure 1**, open the “clam-shell” shaped boot with the “hinge” area away from the cable path. Flex and install the boot so that the opening in the boot will surround the conductor between the glass-polyester conductor support and the cables.
