multiplied as new products have appeared and then been replaced after a few years or even months of existence by a more
fashionable product or one of higher performance The life cycles of the technologies used in consumer and professional
electronic products are also becoming shorter This acceleration is an inherent fact of our consumer society and the

changing no longer have a history they are merely tools which fulfil a predetermined function Personal portable products are
of a new type which has appeared among pens wallets these impersonal objects This category includes watches handbags
calculators portable radios and pocket telephones As these products for the pocket are carried on one's person they belong in
a very personal way and have therefore a specific identity corresponding to the image which they are given In the evolution
of lifestyles the explosive increase of travel and time management are major factors The pocket telephone is therefore
remarkable for two reasons It is not only an impersonal tool or product but is also very much a personal portable product
