Grading for Growth David Clark,Robert Talbert,2023-07-03 Are you satisfied with your current and traditional grading system Does it accurately reflect your students learning and progress Can it be gamed Does it lead to grade grubbing and friction with your students The authors of this book two professors of mathematics with input from colleagues across disciplines and institutions offer readers a fundamentally more effective and authentic approach to grading that they have implemented for over a decade Recognizing that traditional grading penalizes students in the learning process by depriving them of the formative feedback that is fundamental to improvement the authors offer alternative strategies that encourage revision and growth Alternative grading is concerned with students eventual level of understanding This leads to big changes Students take time to review past failures and learn from them Conversations shift from why did I lose a point for this to productive discussions of content and process Alternative grading can be used successfully at any level in any situation and any discipline in classes that range from seminars to large multi section lectures This book offers a comprehensive introduction to alternative grading beginning with a framework and rationale for implementation and evidence of its effectiveness The heart of the book includes detailed examples including variations on Standards Based Grading Specifications Grading and ungrading of how alternative grading practices are used in all kinds of classroom environments disciplines and institutions with a focus on first hand accounts by faculty who share their practices and experience The book includes a workbook chapter that takes readers through a step by step process for building a prototype of their own alternatively graded class and ends with concrete practical time tested advice for new practitioners The underlying principles of alternative grading involve Evaluating student work using clearly defined and context appropriate content standards Giving students helpful actionable feedback Summarizing the feedback with marks that indicate progress rather than arbitrary numbers Allowing students to revise without penalty using the feedback they receive until the standards are met or exceeded This book is intended for faculty interested in exploring alternative forms of learning assessment as well as those currently using alternative grading systems who are looking for ideas and options to refine practice

ELEMENTS OF CIVIL ENGINEERING AND ENGINEERING MECHANICS M. N. SHESHA PRAKASH,GANESH B. MOGAVEER,2014-07-30 This book in its third edition continues to focus on the basics of civil engineering and engineering mechanics to provide students with a balanced and cohesive study of the two areas as needed by them in the beginning of their engineering education A basic undergraduate textbook for the first year students of all

branches of engineering this book is specifically designed to conform to the syllabus of Visvesvaraya Technological University VTU Imparting the basic knowledge in various facets of civil engineering and the related engineering structures and infrastructure such as buildings roads highways dams and bridges the third edition covers the engineering mechanics portion in eleven chapters Each chapter introduces the concepts to the reader stepwise Providing a wealth of practice examples the book emphasizes the importance of building strong analytical skills Practice problems at the end of each chapter give students an opportunity to absorb concepts and hone their problem solving skills The book comes with a companion CD containing the software developed using MS Excel to work out the problems on Forces Centroid Friction and Moment of Inertia The use of this software will enable the students to understand the concepts in a relatively better way NEW TO THIS EDITION Introduces a chapter on Kinematics as per the revised Civil Engineering syllabus of VTU Updates with the latest examination Question Papers including the one held in the month of December 2013 **Advances in Mechanism,**

Machine Science and Engineering in China Xinjun Liu, 2023-05-31 This book presents the conference proceedings of the 23rd IFToMM China International Conference on Mechanism and Machine Science Engineering IFToMM CCMMS 2022 CCMMS was initiated in 1982 and it is the most important forum held in China for the exchange of research ideas presentation of technical and scientific achievements and discussion of future directions in the field of mechanism and machine science The topics include parallel hybrid mechanism synthesis and analysis theoretical computational kinematics compliant mechanisms and micro nano mechanisms reconfigurable and metamorphic mechanisms space structures mechanisms and materials structure adaptation in space environment and ground testing large scale membrane deployable structures construction and application of super scale space systems cams gears and combining mechanisms fluid power mechatronics drivetrain mechanical design theory and methods dynamics and vibration control mechatronics biologically inspired mechanisms and robotics medical rehabilitation robotics mobile robotics soft robotics heavy non road mobile machine robot applications engineering education on mechanisms machines and robotics This book provides a state of the art overview of current advances in mechanism and machine science in China The inspiring ideas presented in the papers enlighten academic research and industrial application The potential readers include academic researchers and industrial professionals in mechanism and machine science **Mechanics Magazine** John I Knight, 1823 **Applied Mechanics**

Civil Engineering and Urban Research, Volume 1 Hazem Samih Mohamed, Jinfang Hou, 2023-03-28 Civil Engineering and Urban Research collects papers resulting from the conference on Civil Architecture and Urban Engineering ICCAUE 2022 Xining China 24 26 June 2022 The primary goal is to promote research and developmental activities in civil engineering architecture and urban research Moreover it aims to promote scientific information interchange between scholars from the top universities business associations research centers and high tech enterprises working all around the world The conference conducts in depth exchanges and discussions on relevant topics such as civil engineering and architecture aiming to provide an academic and technical communication platform for scholars and engineers engaged in scientific research and engineering practice in the field of urban engineering civil engineering and architecture design By sharing the research status of scientific research achievements and cutting edge technologies it helps scholars and engineers all over the world comprehend the academic development trend and broaden research ideas So as to strengthen international academic research academic topics exchange and discussion and promote the industrialization cooperation of academic achievements

Modelling and implementation of a microscopic traffic simulation system Johannes Brüggmann, 2015-11-16 This thesis presents the foundations the initial state and the progress made in modelling and implementing a real world and real time online microscopic traffic simulation system for highway traffic To successfully model and implement such a simulation system this thesis recommends the use of a number of formal methods applied at the

right places As part of the recommendation this thesis proposes a microscopic traffic simulation system To explore the feasibility and the potential of the recommended methods it observes and examines the proposed system from multiple views and under various different aspects As part of the examination this thesis provides a semi formal specification a model implementation an implementation of a productive system and the benefits that result from validating such a system The results and any proper application of them have the potential to increase the reliability and the trustworthiness for any future implementation of the proposed simulation system The presented results additionally motivate to apply the proposed approach to similar simulation systems The thesis concludes the presentation of the results with some considerations for future implementations

Spacematrix Meta Berghauser Pont, Per Haupt, 2023-05-23 Spacematrix explores the potential of urban density as a tool for urban planning and design This revised and extended edition of Meta Berghauser Pont and Per Haupt's 2010 volume includes an extensive analysis of the relations between density urban form and performance a prerequisite for understanding and successfully predicting the effects of specific designs and planning proposals The density database that is an integral part of the book has been expanded and now includes 142 examples from five capitals in Europe as well as examples from Asia Berghauser Pont and Haupt demystify the use of concepts such as urbanity compact city and park city by challenging the reliability of such concepts and critically examining the possibility of redefining them through quantification using multiple density measures Spacematrix is of interest to professionals working in the field of urbanism such as architects urban planners and designers as well as developers economists engineers and policymakers It also offers researchers a method to quantitatively describe urban form and connect this to a wide range of performances
