Routledge Handbook of Energy in Asia Subhes Bhattacharyya, 2017-10-12 The Routledge Handbook of Energy in Asia presents a comprehensive review of the unprecedented growth of Asian energy over the past quarter of a century It provides insightful analysis into variation across the continent whilst highlighting areas of cross learning and regional cooperation between the developed and developing countries of Asia Prepared by a team of leading international experts this book not only captures the East Asian domination particularly that of China but also highlights the growing influence of South Asia and the ASEAN Organised into four parts the sections include the demand for energy in the region and its main drivers at the sector level developments in energy supply including fossil fuels and renewable energy sources energy policies and issues such as sector reform and climate change the transition to a low carbon pathway This handbook offers a complete picture of Asian energy covering supply and demand as well as contemporary challenges in the sector As such it is a valuable resource for students and scholars of energy policy Environmental Studies and Asian Studies

Global Energy Paul Ekins, Mike Bradshaw, Jim Watson, 2015-09-17 Energy and access to energy are essential to human life civilisation and development A number of energy issues including energy security energy prices and the polluting emissions for energy use now have high prominence on global agendas of policy and diplomacy In addressing these and other global energy issues the purpose of this book is to lay out the broad global energy landscape exploring how these issues might develop in coming decades and the implications of such developments for energy policy There are great uncertainties which will be identified in

respect of some of these issues but many of the defining characteristics of the landscape are clear and the energy policies of all countries will need to be broadly consistent with these if they are to be feasible and achieve their objectives The book therefore provides information about and analysis of energy and related resources and the technologies that have been and are being developed to exploit them that is essential to understanding how the global energy system is developing and how it might develop in the future But its main focus is the critical economic social political and cultural issues that will determine how energy systems will develop and which technologies are deployed why by whom and who will benefit from them The book has three Parts Part I sets out the current global context for energy system developments outlining the essential trends of global energy supply and demand and atmospheric emissions from the past and going forward and their driving forces Part II explores the options and choices covering both energy demand and energy supply facing national and international policymakers as they confront the challenges of the global context outlined in Part I Part III of the book brings together the discussion in Parts I and II with consideration of possible global energy and environmental futures and of the energy policy choices which will determine which future actually comes to pass

Energy Tax and Regulatory Policy in Europe Ian Parry, Karen Pittel, Herman Vollebergh, 2017-09-15 Concise introductions to the main issues in energy policy and their interaction with environmental policies in the EU The European Union EU faces critical challenges in energy policy making the most pressing of which are how to achieve the deep greenhouse gas reductions promised at the December 2015 UN Conference of the Parties in Paris and how this effort can be coordinated with already existing policies Energy policy is primarily a member state responsibility and policy makers need an overarching view of the main issues in energy policy and their interaction with environmental policies This volume aims to fill this need offering concise introductions to some of the major issues as well as practical suggestions for policy making The contributors discuss reforms to the EU Emissions Trading System ETS the world's largest carbon market ways to improve the operation and integration of the EU's power grids in terms of both supply and demand changes to the EU's Energy Tax Directive which sets tax floors for fuels outside the ETS the coordination of climate policies with policies to promote renewables and energy efficiency research into clean technology challenges to shale gas development and transportation policy and the need for action on such externalities as traffic congestion Finally contributors consider obstacles to reform including its potential effects on vulnerable households and energy intensive industries Contributors Mikael Skou Andersen Niels Anger Bruno De Borger Antoine Dechezleprêtre Jos Delbeke Ottmar Edenhofer Christian Flachsland Beatriz Gaitan Polona Gregorin Cameron Hepburn Alan Krupnick Andreas L.
