What are some differences you have observed? How would they change if you were present?

There is a difference between the shells as they are found within the water column.

Integrate information about shell features as design strategy. How would competition affect?

Evolutionary change is more likely than any single species that changes. When competition increases, a change in the way an organism adapts to its environment is more likely.

What would happen if the weight of the shell was increased? Would there be any change in the way the organism adapts to its environment?
