The charge nurse for the previous night shift is giving verbal report to Ms. Hatch and the oncoming staff nurses. During the report, one of the UAPs interrupts to state that a client is vomiting. How should Ms. Hatch respond?

Answer- Request that a night shift nurse staff RN go to the room to evaluate the situation

After the UAP leaves the area, the night charge nurse states, "that UAP is incompetent. She can't figure out anything on her own." As the day shift charge nurse, how should Ms. Hatch respond?

Answer- Your concern needs to be addressed with the unit manager

After receiving report, Ms. Hatch makes client care assignments for the nursing staff. Which client can be assigned to a PN rather than an RN?

Answer- A 2 day postop client with an abdominal incision and JP drain

Which additional client should be assigned to the same PN?

Answer- Experiencing hypoactive bowel sounds 2 days post op after colon resection (expected finding)

Ms. Hatch learns that one of the day shift nurses will be 30 minutes late. How should the care assignments be managed until the nurse arrives?

Answer- Assign an additional client to each of the day shift staff nurses

When making initial rounds, the charge nurse should see which case first?

Answer- A postop client with a trach who has signs of a tracheoesophageal fistula

Before starting rounds, Ms. Hatch learns from the PN that the client with a history of syncope is threatening to get out of bed alone and go to the restroom. At the same time, the client with the possible fistula has an oxygen level of 80%. Besides the charge nurse and PN, a UAP is available. How should the charge nurse respond this information?

Answer- Assess the client with the possible fistula while the PN assists the other client to the restroom

Once the immediate priorities are managed, Ms. Hatch assesses the client with continuous bladder irrigation and notes that the drainage bag is full, but there is no urine
