QUESTION 3

- 3.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 6 000 years old, near Mafikeng is almost destroyed because of excessive extraction of water from the nearby Molepo river. The water is extracted for human consumption.

Peat lands like the one near Mafikeng is exceptional and play an important role in storing water as well as preventing climate changes.

Dr Phil-Louis Grundling said that carbon that is 'held' or 'stored' by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The "sponge effect" of the peat also makes it possible to store water that is then released during dry seasons.

Dr Grundling said that it might be too late to restore the peat land near Mafikeng but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and frog species that lived in this peat land was also destroyed.

From: *Beeld*, 24 September 2016.

- 3.1.1 Give TWO other reasons (not mentioned in the passage) that can lead to the destruction of wetlands. (2)
- 3.1.2 Discuss reasons from the passage regarding the importance of these specific wetlands for the environment. (4)
- 3.1.3 Suggest a way in which this peat land near Mafikeng can be restored. (2)

Courting Science Damon V. Coletta, 2016-05-25 In *Courting Science* Damon Coletta offers a novel explanation for the decline of American leadership in world affairs Whether the American Century ends sooner rather than later may depend on America's capacity for self reflection and ultimately self restraint when it comes to science technology and engineering Democracy's affinity for advanced technology has to be balanced against scientific research and progress as a global enterprise In an era of rising challengers to America's lead in the international order and an increasingly globalized civil society a Scientific State has a better chance of extending its dominance In order to draw closer to this ideal though the United States will have to reconsider its grand strategy It must have a strategy that scrutinizes how tightly it constrains how narrowly it directs and how far it trusts American scientists If given the opportunity scientists have the potential to lead a second American Century through domestic science and technology policy international diplomacy and transnational networks for global governance

Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19 For patients and their loved ones no care decisions are more profound than those made near the end of life Unfortunately the experience of dying in the United States is often characterized by fragmented care inadequate treatment of distressing symptoms frequent transitions among care settings and enormous care responsibilities for families According to this report the current health care system of rendering more intensive services than are necessary and desired by patients and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families *Dying in America* is a study of the current state of health care for persons of all ages who are nearing the end of life Death is not a strictly medical event Ideally health care for those nearing the end of life harmonizes with social psychological and spiritual support All people with advanced illnesses who may be approaching the end of life are entitled to access to high quality compassionate evidence based care consistent with their wishes *Dying in America* evaluates strategies to integrate care into a person and family centered team based framework and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families The findings and recommendations of this report will address the needs of patients and their families and assist policy makers clinicians and their educational and credentialing bodies leaders of health care delivery and financing organizations researchers public and private funders religious and community leaders advocates of better care journalists and the public to provide the best care possible for people nearing the end of life

The Digital Coloniality of Power Alexander I. Stigl, 2015-12-16 Trouble is afoot in Digital Culture and Nerdland These are Alexander I Stigl claims not the engine of freedom and democracy that they once were hailed to be this much is already clear in the wake of the snooping and surveillance crises that broke in recent years Digitalization is but another version of the coloniality of power and being that has been at work for decades and centuries He poses the question whether Digital Age possess the legitimacy that digitalization has claimed His response is critically realistic but he doesn t stop at a critique for criticism s sake Inspired by the ideas of decolonial scholars feminist science studies current biological and neuro cognitive research and sociologists capable of reflection and self criticism Stigl attempts to break the canvas of sociology and show that adding a third and decolonial dimension to the two dimensional sociological imagination is indeed possible He illustrates that it is possible that class rooms free speech on internet and the inequalities in the production and distribution of a new form of social capital digital cultural health care capital can be subjected to a decolonial perspective along a sociological line of inquiry if sociologists allow for relations with other disciplines and scholarship to be integrative conversations The goal of this book is not to offer results or closed arguments but to create instead platforms for thinking further opening new lines of inquiry and to argue that it is not enough to identify problems or to attempt solve the problems with politics or best practice solutions Instead he proposes we must learn to identify and make use of the opportunities that are produced by any problem Stigl s conclusion is in short that a sociology that takes the decolonial challenge and critique seriously can not be a sociological sub discipline or a sociology of a problem but it must be a sociology of opportunities

The War on Sex David M. Halperin, Trevor Hoppe, 2017-03-09 The past fifty years are conventionally understood to have witnessed an uninterrupted expansion of sexual rights and liberties in the United States This state of the art collection tells a different story while progress has been made in marriage equality reproductive rights access to birth control and other areas government and civil society are waging a war on stigmatized sex by means of law surveillance and social control The contributors document the history and operation of sex offender registries and the criminalization of HIV as well as highly punitive measures against sex work that do more to harm women than to combat human trafficking They reveal that sex crimes are punished more harshly than other crimes while new legal and administrative regulations drastically restrict who is permitted to have sex By examining how the ever intensifying war on sex affects both privileged and marginalized communities the essays collected here show why sexual liberation is indispensable to social justice and human rights Contributors Alexis Agathocleous Elizabeth Bernstein J Wallace Borchert Mary Anne Case Owen Daniel McCarter Scott De Orio David M Halperin Amber Hollibaugh Trevor Hoppe Hans Tao Ming Huang Regina Kunzel Roger N Lancaster Judith Levine Laura Mansnerus Erica R Meiners R Noll Melissa Petro Carol Queen Penelope Saunders Sean Strub Maurice Tomlinson Gregory Tomso

Imagine There's No Heaven Mitchell Stephens, 2014-02-25 The historical achievements of religious belief have been large and well chronicled But what about the accomplishments of those who have challenged religion Traveling from classical Greece to twenty first century America *Imagine There's No Heaven* explores the role of disbelief in shaping Western civilization At each juncture common themes emerge by questioning the role of gods in the heavens or the role of a God in creating man on earth nonbelievers help move science forward By challenging the divine right of monarchs and the strictures of holy books nonbelievers including Jean Jacques Rousseau and Denis Diderot help expand human liberties and influence the early founding of the United States Revolutions in science in politics in philosophy in art and in psychology have been led on multiple occasions by those who are free of the constraints of religious life Mitchell Stephens tells the often courageous tales of history's most important atheists like Denis Diderot and Salman Rushdie

Stephens makes a strong and original case for their importance not only to today's New Atheist movement but to the way many of us believers and nonbelievers now think and live
