or impossible to envision a process flow especially when someone else is describing it Understanding current workflows however is critical to defining a future IT solution Just as critical is understanding how data is created and consumed throughout the workflow To truly understand problems inherent in a business process or workflow you need to help the practitioners visualize what they do Visualization lets them identify better ways of working that remove current restrictions Data Flow Diagrams are phenomenal tools for visualization Working with business experts you can help them identify problems and inefficiencies they don't even know they have These are not people problems they are process problems Understanding when and how to create and use Data Flow Diagrams will help you discover and capture the requirements for improving the use of information technology Why Should You Take this Course In Data Flow Diagrams Simply Put you will learn the benefits of process visualization for the business community for the one wearing the BA hat for those tasked with developing the solution and ultimately for the entire organization You will also discover how DFDs are powerful tools for recognizing and eliminating two of the major problems that haunt IT projects namely Scope Creep and Project Overruns caused by late project change requests This book uses a concrete business scenario to present a simple easy to learn approach for creating and using Data Flow Diagrams depicting workflow and data manipulation from interviews with Subject Matter Experts You will learn how to create a Context Level Data Flow Diagram and explode relevant processes to reveal the nitty gritty detail i.e. individual process and data specifications that developers need to create IT solutions that the business community needs This book answers the following questions What is a Data Flow Diagram DFD What is a Rigorous Physical Process Model What is a Context Level DFD Why should I use Data Flow Diagrams What symbols can I use on each type of diagram How can I drill down into a process How can I show internal processes and flows that produce the results What does balancing a Data Flow Diagram mean and what is the business value What is the most efficient approach to balancing a DFD What business value do process specifications offer How can I express detailed specifications for processes and data What is metadata and why do you need it What does a fully balanced DFD look like What value does a DFD fragment provide Regardless of your job title or role if you are tasked with communicating a workflow or functional requirements to others this book is for you **WHO WILL BENEFIT FROM READING THIS BOOK** Many distinct roles or job titles in the business community perform business needs analysis for digital solutions They include Product Owners Business Analysts Requirements Engineers Test Developers Business and Customer side Team Members Agile Team Members Subject Matter Experts SME Project Leaders and Managers Systems Analysts and Designers **AND** anyone wearing the business analysis hat meaning anyone responsible for defining a future IT solution **TOM AND ANGELA S** the authors **STORY** Like all good IT stories theirs started on a project many years ago Tom was the super techie Angela the super SME They fought their way through the 3 year development of a new policy maintenance system for an insurance company They vehemently disagreed on many aspects but in the process discovered a fundamental truth about IT projects The business community Angela should

decide on the business needs while the technical team's Tom's job was to make the technology deliver what the business needed. Talk about a revolutionary idea! All that was left was learning how to communicate with each other without bloodshed to make the project a resounding success. Mission accomplished! They decided this epiphany was so important that the world needed to know about it. As a result, they made it their mission and their passion to share this ground-breaking concept with the rest of the world. To achieve that lofty goal, they married and began the mission that still defines their life. After over 30 years of living and working together 24x7x365, they are still wildly enthusiastic about helping the victims of technology learn how to ask for and get the digital IT solutions they need to do their jobs better. More importantly, they are more enthusiastically in love with each other than ever before.
