*From Darkness to Light* Lori Lynn,2013-01-23 In a room with no light what can you see in the total darkness What if a flashlight is turned on or one candle is lit how much can you see Probably a little but not everything but when the light is turned on illuminating the entire room what can you see Everything When light first enters the darkened room it is often like a single candle burning with some things illuminated but not everything After having been in total darkness when light enters the vision is blurred and has to adjust but the longer you are in the Light the more you see with your eyes and the more that is illuminated everything becomes clearer That is how it is within our hearts when Jesus enters bringing His Light What we thought was one thing ends up not being at all what we thought we discover in the darkness where we had been there are many deceptions It takes the light of truth to reveal lies we have believed so we can be set free Sometimes we have lived in a half lit room instead of the fullness of Light and it can damage our vision our perception the way we process things This book will help to bring you out of darkness and into the Light
