Medicine Meets Virtual Reality 14 J.D. Westwood, R.S. Haluck, H.M. Hoffman, 2006-01-04 Machine intelligence will eclipse human intelligence within the next few decades extrapolating from Moore's Law and our world will enjoy limitless computational power and ubiquitous data networks Today's iPod devices portend an era when biology and information technology will fuse to create a human experience radically different from our own Already our healthcare system now appears on the verge of crisis accelerating change is part of the problem Each technological upgrade demands an investment of education and money and a costly infrastructure more quickly becomes obsolete Practitioners can be overloaded with complexity therapeutic options outcomes data procedural coding drug names etc Furthermore an aging global population with a growing sense of entitlement demands that each medical breakthrough be immediately available for its benefit what appears in the morning paper is expected simultaneously in the doctor's office Meanwhile a third party payer system generates conflicting priorities for patient care and stockholder returns The result is a healthcare system stressed by scientific promise public expectation economic and regulatory constraints and human limitations Change is also proving beneficial of course Practitioners are empowered by better imaging methods more precise robotic tools greater realism in training simulators and more powerful intelligence networks The remarkable accomplishments of the IT industry and the Internet are trickling steadily into healthcare The Medicine Meets Virtual Reality series can readily see the progress of the past fourteen years more effective healthcare at a lower overall cost driven by cheaper and better computers *Ionizing Radiation Detectors for Medical Imaging* Alberto Del Guerra, 2004 Ionizing Radiation Detectors for Medical Imaging contains ten technical chapters half of which are devoted to radiology and the other half to nuclear medicine The last chapter describes the detectors for radiotherapy and portal imaging Each chapter addresses completely a specific application The

emphasis is always on detector fundamentals and detector properties Where necessary software and specific applications are described in depth This book is intended for graduate and undergraduate students in physics and engineering who want to study medical imaging In addition scientists who are working in a specific sub field of medical imaging can acquire from the book an up to date description of the state of the art in related sub fields within the scope of ionizing radiation detectors Other scientists as well as physicians can use the book as a reference for medical imaging

Biomarkers in Autoimmune Diseases of the Central Nervous System Mei-Ping Ding,Long-Jun Wu,Shougang Guo,Honghao Wang,Yin-Xi Zhang,2023-09-25 Autoimmune diseases of the central nervous system CNS are a group of complex and disabling disorders characterized by the immune system mistakenly attacking the CNS During the last 2 decades we have witnessed a rapidly evolving spectrum of CNS autoimmune diseases which has become a research hotspot in neurology These include CNS inflammatory demyelinating diseases such as multiple sclerosis and neuromyelitis optical spectrum disorders paraneoplastic and other autoimmune encephalomyelitis and CNS involvement in systemic autoimmune diseases Recently although remarkable discoveries have accumulated more understanding of the autoimmune basis behind the physiopathologic mechanism the exact pathogenic processes are still unclear Patients may present with a variety of manifestations posing a great challenge to diagnosis and management The

determination of biomarkers plays a significant role in CNS autoimmune diseases Biomarkers can reflect the presence nature and intensity of certain immune responses triggered by both genetic and environmental processes and bear great importance in guiding clinical diagnosis estimating disease risk or prognosis evaluating disease severity and monitoring progression or response to therapy For instance the detection of disease specific antibodies can contribute to the accurate diagnosis and precise treatment Moreover identifying the diverse biomarkers could further help to achieve the ultimate goal of
